Hey Darla,

I do have the email and have forwarded it with this email. Let me know if you need anything else.

Thanks,

Scott R. Bergendorf

Hi Scott,

I received a note from Robert Price along with his Proof Statement. He refers to an email he sent you of some colored photos that he was hoping you would forward to me because his printer only prints in black & white. Do you happen to still have his email with the colored photo attachment?

Darla

Subject: Permit # 75-14776 Statement of Completion

Scott,

As I discussed this morning, I'm finishing up the Statement of Completion for the above mentioned water right for our property at 37 Wagon Wheel Road, Salmon, ID 83467. As you specified I should, I went down and took some photos of the diversion which is on the corner of Demick Lane, and US Hwy 93. Here they are:

This photo shows the diversion gate which is currently closed.

This photo shows the culvert which runs under US 93 conveying water to all permit holders in the Lovers Lane, Wagon Wheel Road area, showing the lockable diversion and potential for measuring flow:

I irrigated on three occasions during June and July of 2014. We received so much rain in August that there was no need to irrigate. Here's a couple of photos of a portion of my pasture after irrigation. It's pretty lush!:

As I mentioned on the phone, the latest satellite photos on Google Earth show my property with the tarp dams in place for irrigation last summer, see below:

Please convey this information to the appropriate folks in Boise, and I'll send my Statement of Completion to them as well.

Thanks for all your help over the past two years!!

Robert Price
