Re: Existing well – Water Right No. 63-16116

Dear Rachel:

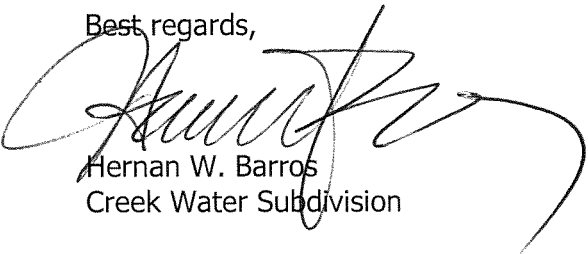

We are writing at your request to explain the intended use for the existing well at the Creek Water subdivision. The well water will be used when canal water used for irrigation is no longer available during late Fall and Winter so that the irrigation pond is continually filled with water. This will prevent the pond liner from being exposed to the elements (ice, snow) and deteriorating.

Michele Edl and her supervisor, Pam Skaggs, were kind enough to meet with us two days ago and gave us a copy of Idaho Statutes, Title 42, Chapter 1, which states any use other than "domestic use" is acceptable if the diversion rate does not exceed .04 cubic feet per second and a diversion volume of 2,500 gallons per day. Our use of the existing well will fall well below that limit.

We provided a copy of what Michelle Edl gave us to you and Kay Walker to facilitate your understanding of what is intended, in addition to stating that a backflow prevention device will be installed to prevent potential contamination of the ground water with the pond's mixture of canal and well water.

In order to obtain the subdivision's Final Plat, we need a letter from the Idaho Department of Water Resources stating that the existing well can be used (pursuant to Title 42) to supplement the surface irrigation water (provided by the New Dry Creek Ditch Company). Intended use will be below the limit of 2,500 gallons per day.

Best regards,

Hernan W. Barros
Creek Water Subdivision
