Evaluation of overall mitigation requirements per reach Steady State and Transient State, and Off-Setting Benefits (Sum of reach debits only where mitigation is required and credits)

Carry out one way analysis. If reach depletions go up, it is a debit, if they go down, it is a credit. Sum all debits, only where mitigation is required (dark yellow), and all credits (light yellow). Mitigation is required for the full amount of the summed values if greater than zero.

Steady state analysis represents permanent mitigation requirements at future steady state (or last timestep from the ESPAM Transfer Tool model run).

Transient state analysis represents mitigation requirements for the worst or maximum time step in the model run.

Evaluation of transient state mitigation requirement is not comprehensive across all time steps. Instead this evaluation finds the maximum stream depletion following the start of the transfer and looks at depletion amounts from that time step. In many instances this depletion is greater than the depletion associated with the steady state condition or final time step. This evaluation is merely an indicator of whether transient depletions must be considered, not an indicator of all transient impacts.

Evaluation of Permanent Mitigation Efforts (non-use, acreage consolidation) In Addition to Off-Setting Transfer Benefits - Steady State Evaluation Only

Re: Idaho Water Company

Dear Mr. Skinner:

Idaho Water Company submitted a transfer to convert 9.7 acres of irrigation water from water rights 36-2594 and 36-2117 to a dairy facility as stock and commercial water near Paul, Idaho.

The intent of the transfer is to have a place of use of stock and commercial water in the NWNW of Sec. 28 T 09S R 22E. The map submitted with the transfer is not completely accurate as to the proposed place of use. A new map will be provided to IDWR.

MEMORANDUM

Date: April 29, 2015
To: Transfer 80034 File
From: Corey Skinner
Re: Evaluation of Sufficiency of Information Submitted

Application proposes transferring a 9.7 acre (0.19 cfs) portion of two ground water irrigation rights currently used on a farm located approximately 5.0 miles south of Hazelton to provide additional water at an existing dairy operation located approximately 0.75 – 1.0 miles north and 5.25 – 5.5 miles west of Paul. The transferred rights (0.19 cfs and 30 AFA) will be diverted from two existing wells located at the dairy site. The current and proposed points of diversion are located within the ESPA. A groundwater model analysis was performed and included with the transfer. According to the model analysis, this transfer results in depletions to hydraulically connected reaches of the Snake River small enough to not require mitigation (negative impacts less than 2 AF per trimester). The transfer moves water within Water District 130 so water master comments will be solicited.

- **Authority to File:**

The application is filed in the name of Idaho Water Company. The application includes a copy of a purchase and sales agreement signed by Idaho Water Company and Myron and Ellen Huettig, the current owners of the rights involved with the transfer. The application also includes a copy of a purchase and sales agreement signed by Wietze and Kristy De Vries (owners of the new place of use) and Idaho Water Company. These agreements make the parties aware of the transfer and indicate that the eventual sale of the water rights is contingent on the completed transfer of the water rights.

- **Water Right Validity:**

The rights involved with the transfer were decreed in the SRBA in 2001 and examination of recent aerial photography indicates that the current place of use appears irrigated. The rights involved with the transfer were subject to recently approved transfer # 79700 (approved April 10, 2015).

- **Injury to Other Water Rights:**

None anticipated.

- **Enlargement of Use:**

None anticipated. Conversion from irrigation to dairy use actually results in a reduction of potential diversion volume.

- **Local Public Interest:**
No issues anticipated. The application will be subject to public notice and protest.
- **Beneficial Use/Conservation of Water Resources:**
Proposed uses are recognized as beneficial uses of water.
- **Effect on Economy of the Local Area:**
None anticipated.
- **Effect of the Agricultural Base of the Local Area:**
None anticipated.

Review of the application finds there is no clear inconsistency with criteria set forth in Section 42-222 Idaho Code preventing processing of this application.

Re: Idaho Water Company

Dear Mr. Skinner:

Idaho Water Company desires to transfer 9.7 acres of irrigation water from water rights 36-2594 and 36-2117 to a dairy facility as stockwater and commercial near Paul, Idaho. Idaho Water Company has purchased the water from Myron and Ellen Huettig.

A consumptive use analysis has been performed and is provided with this transfer application utilizing frequent cuttings of alfalfa at 3.10 ac-ft annually. The period of use will be changing to Jan. 1st through Dec. 31st. There are two existing PODs at the dairy facility.

ESPA model analysis has been performed and no mitigation will be required from this proposed transfer.

Please contact me if you have any questions.
