Vic,

The Department agrees this is a reasonable request. Please provide IDWR with the Place of Use description or Licensing Amendment by September 1, 2015. Any questions, call me at 334-2190.

Sincerely,

Patrick Kelly

Subject: Application to Amend 51-7292.

Patrick,

Simplot is a member of the Echo Stock Water system. It is my understanding there is an April 30, 2015 deadline to respond to the proposed amendment that was transmitted to the BLM earlier for this water right permit.

This is a very large stockwater system. We (Simplot & BLM) would like to confirm, in the field, the location of each place of use. With other comparable stockwater systems, we have confirmed this information by locating each trough with GPS coordinates, working with the users of the system. It will take the spring and summer months to accomplish this. Many of these areas cannot be reach during the late fall, winter and spring.

We are requesting an extension until September 1 to allow time to complete our field work. Such an extension will not result in injuring any other water user and it will give us time to verify and make any adjustment you are proposing for the places of use. Please let me know if extending the response time until September 1, 2015 is acceptable.
