Hello Lisa,

I am contacting you to follow up with the information request regarding water right 51-7292. We had spoken before Thanksgiving about contacting a field agent that may be able to provide some detailed information on the Echo Water Users Assn diversion out of the East Fork Bruneau River. Anything we can come up with on this would be useful.

Thanks again,

Patrick Kelly

Hi Lisa,

I have attached 2 files here. The proof report has the strict details of the permit while the back file contains everything regarding the water right history. Probably way more information than your department needs, but it might help your group identify which exact project we are talking about. Again, we are looking for any information at the point of diversion such as pump curves, horsepower, system pressures, pumping levels, gps or photos to the system that can help determine a flow rate. If we have to, we can schedule a time in the spring to do a field exam. It has taken me some time to track down anyone that can assist me with this, so I appreciate your help.

Have a happy Thanksgiving!

Patrick Kelly
