Fredric,

Thank you for your response on September 5th. This is just a follow up to see if any additional information on the system has turned up.

Patrick

Patrick,

RE: 51-07292 (5101788299): permit working towards licensing
Echo II Pipeline, Proj #6187

I'll see if we can dig up information on the pump specs from the project file (Echo II Pipeline, Proj #6187) or elsewhere. This range improvement project resides within BLM's Jarbidge Field Office. Trevino is in our Owyhee FO.

Fred

Mr. Trevino & Price,

I am contacting you today in regards to water permit 51-7292. I was assigned to complete the field exam for this right which was started in July of 1993. In an effort to complete the water right process, I am looking for additional information about the water system regarding this permit. I was forwarded your contact information as a representative of the Bureau of Land Management and owners of the water permit.

Water permit 51-7292 is a stockwater and storage permit from the East Fork Bruneau River. I have attached a map that outlines the Place of Use (teal squares) and the point of diversion (green dot) for this water system. There is also a proof report that outlines the details of the water permit. **I am specifically looking for pump spec information and details of the use of the water system.** Any information you can pass on is useful in this licensing process.

Please see my contact information below with any questions.

Sincerely,

Patrick Kelly
