Re Permit To Appropriate Water No. 63-31308

Dear Mr. and Mrs. Hall; Mr. and Mrs. Pruett; and, Mr. Allen:

The permit referenced above was issued to Phil Smith of Anchor Development, for domestic use for three residential lots in the Eagle Heights Addition, Second Division, from ground water. I have enclosed a copy of the permit with each of your letters.

Although the owner of this permit is Anchor development, it appears from Canyon County Assessor information that you may be the current owners of the property, and perhaps the permit should be in your names. A permit is considered personal property and the owner of the permit must assign the permit to the new owners for IDWR to change its records. I sent an Assignment of Permit form to Mr. Smith for him to sign the permit to you. I will let you know if he responds.

In the meantime, I request that you call me to schedule the field exam for this permit. A field exam is required by Idaho law before a license can be issued, at which time it becomes a water right. The license is the end product needed for continued water use.

Additionally, please have available at the exam someone familiar with the system and its construction, as well as the following documentation:

- 1 – pump and motor specs;
- 2 - the depth at which the pump is set; and,
- 3 – a pump curve.

Please call me as soon as possible at 208.334.2190, to set an appointment for the exam. Failure to respond to this letter request **by December 13, 2013**, may result in the permit being voided or a license issued for less than the permitted amount. Thank you.

Sincerely,

CONDITIONS OF APPROVAL

1. Proof of application of water to beneficial use shall be submitted on or before December 1, 2003.
2. Subject to all prior water rights.
3. Project construction shall commence within one year from the date of permit issuance and shall proceed diligently to completion unless it can be shown to the satisfaction of the Director of the Department of Water Resources that delays were due to circumstances over which permit holder had no control.
4. Right holder shall comply with the drilling permit requirements of Section 42-235, Idaho Code.
5. The Director retains jurisdiction to require the right holder to provide purchased or leased natural flow or stored water to offset depletion of Lower Snake River flows if needed for salmon migration purposes. The amount of water required to be released into the Snake River or a tributary, if needed for this purpose, will be determined by the Director based upon the reduction in flow caused by the use of water pursuant to this permit.
6. The irrigation occurring under this domestic use shall not exceed 1/2 acre within each platted subdivision lot upon which a home has been constructed.
7. The domestic use authorized under this right shall not exceed 13,000 gallons per day per home.
8. The right holder shall use the full allotment of appurtenant surface water rights in conjunction with groundwater diverted for irrigation purposes under this right and shall only divert groundwater under this right for irrigation purposes when water from the appurtenant surface water rights cannot be delivered to the right holder.
9. If the surface water right(s) appurtenant to the place of use is sold, transferred, leased or used on any other place of use, this right to divert groundwater shall not be used for irrigation purposes without an approved transfer pursuant to Section 42-222, Idaho Code, or approval of the Department if a transfer is not required.
