

6. General Information:

- a. Who owns the water right to be changed? APPLICANT
- b. Describe the arrangement allowing use of the right. N/A
- c. Describe the affect on the land now irrigated if the change is approved pursuant to this application:
NO CHANGE
- d. Has the water right sought to be transferred been used this year? ☐ Yes ☒ No If yes, explain. _____
- e. Absent the changes, how would the right be used for the remainder of the year? right would not be used
- f. Describe other water rights used for the same purpose. Little Wood River Irrigation District shares
- g. Remarks: a permanent transfer was filed in Nov 2014 to add this well to the right, but that transfer has not yet been processed. Canal water is on now and we need to divert ground water at the same time. Well diverted into East Canal and rediverted into pivot.

I hereby assume all risk in accordance with Section 42-222A, Idaho Code, and assert that no one will be injured by such change and that the change does not constitute an enlargement in use of the original right. The information contained in this application is true to the best of my knowledge. I understand that any willful misrepresentations made in this application may result in voiding its approval.

RECOMMENDATION OF WATERMASTER

Application No: temporary approval
Water Right No: 37-2515A
Applicant Name: Hansen

Watermaster's Recommendation:

- a) ☒ I do not oppose approval of this application
- b) ☐ I do not oppose approval of this application under the following terms:
- c) ☐ I oppose approval of this application(s) for the following reasons:
- d) ☐ Additional comment:

Temporary pod is measured by WD130 and monitored by WD37N as it is injected into the East Canal. I have advised the 37N watermaster of this change and asked him to let me know if he has any objections.

I consider this a drought related application. This is a supplemental right and diversions under the right would not be necessary if there were a full supply of LWID water available. In WD37N supplemental rights diverted into the LWID canal system are used during the irrigation season to extend storage supply, rather than on the shoulders of the season. Surface water is on and the right needs to be diverted now.
