Subject: RE: settlement agreement for reed

Michelle,

The pending application for Adam Reed is for the irrigation of 10 acres along with a diversion rate of 0.2 cfs (90gpm). If this right were perfected at face value, the total annual volume would be 30 acre feet (3 acre feet/acre allotment).

#5 of the Settlement Agreement omitted an agreed upon diversion rate and in part(b) the 3 acre feet annual volume is only good for about one (1) acre of irrigation.

There needs to be an agreed upon diversion rate and number of acres to be irrigated.

Thank you for the opportunity to comment.

Michelle,
The rough draft was not attached to your email.

Subject: settlement agreement for reed

Hi Keith,

I have attached a rough draft of a settlement agreement (1 page, very short) for the Adam Reed water right #87-10081 between Reed and Latah County.

Please let me know if we are on the right track here. Please especially comment on the part about implementation by your office.

Thanks for your help.

Michelle Fuson
Latah County
