I am protesting the application of the drilling of new wells. I feel that the water permit being applied for will hurt the water table immensely for the farmers in this area. We have already seen the impact on our wells by the other wells that have been allowed to be drilled in our area. We are having to lower our irrigation well due to lack of water last year. This particular well has a priority date of 1941.

It is my opinion that no more wells should be drilled in this valley for irrigation use. I feel it is impossible to continue to pump water out of this valley at the rate that is already being pumped.
