

MEMORANDUM

DATE: March 25, 2015

TO: Permit File Nos. 25-14199 & 25-14236

FROM: Darla Block

RE: Extensions Received for Lapsed Permit Nos. 25-14199 & 25-14236

TIMELINE

Development period from permit approval date to current proof due date: 5 years
(January 22, 2010 to February 1, 2015)

Permit Allows a Maximum Diversion Rate of 0.83cfs

Domestic use is for 130 homes.

Proof Due date: February 1, 2015

Proof Due Notices Sent on: November 28, 2014

Lapse Notices Sent on: February 5, 2015

Requests for Extension of Time & Attachments Received on: February 23, 2015
(Filed under Government Delay)

Since Issuance of the Permit on January 22, 2010, the following occurred:

- DEQ completes their environmental determination for the permit holders drinking water improvements, after a finding of no significant impact (FONSI): **November 9, 2012**

Summary of Findings:

I made the decision to process both extension requests under government delay for the time period between January 22, 2010 (Date water right permit was issued), to November 09, 2012 (Date of attachment D submitted as evidence of government delay by Department of Environmental Quality). This allowed an amount of time equal to 1,022 days of free time which is not counted against the time allowed for development of the permits.

Only one extension allowed later on each permit under due diligence or good cause for up to 5 more years.
