**RE: APPLICATION(S) TO LEASE A WATER RIGHT TO AND RENT A WATER RIGHT
FROM THE WATER SUPPLY BANK FOR WATER RIGHT NO. 63-32060**

******TIME SENSITIVE RESPONSE REQUIRED*****

Dear Danial

The Department of Water Resources received applications to Lease and Rent Water Right 63-32060 from you on February 23, 2015. Upon review of your applications the department has determined that we can accept the right for lease into the Water Supply Bank. This will stay the forfeiture clock while the right is in the WSB. However, the rental application cannot be processed.

The Department is returning your application to rent water from the Water Supply Bank. This letter is notice that the attached application for rental of water is **denied** for the following reasons:

- The Water Supply Bank Rules govern the Water Resource Board's operation and management of a Water Supply Bank provided for in Sections 42-1761 to 42-1766, Idaho Code. The purposes of the Water Supply Bank, as defined by statute, are to encourage the highest beneficial use of water; provide a source of adequate water supplies to benefit new and supplemental water uses.
- The well has not been constructed at the point of diversion identified on the rental application. Therefore, there would be no beneficial use of the water.

Because the Department cannot process the Application to Rent the water right, I wish to give you an opportunity to continue with your 5-year lease (as requested) or reduce the lease to a 1-year term to allow you to be able to withdraw it at the end of the year. This will give you the flexibility of not placing the right back in the bank if you are ready to put the water to beneficial use. We will hold any action on your lease application pending your notification of how you wish to proceed on the lease.

I have requested a refund of \$66.30 be sent to you for receipt # C099951.

If you have any questions, please contact me at (208) 287-4910.

Sincerely,

Clay Webster

Water Resource Agent

Is this application being submitted with a lease application as a lease/rental package?

Yes ☒ No ☐

An *Application to Rent Water from the Board's Water Supply Bank* must be completed in accordance with the minimum requirement checklist below to be acceptable for processing by the Idaho Department of Water Resources (IDWR). This checklist is part of the rental application and must be included with the rental application. **Applications that do not meet the minimum requirements will not be placed in the processing queue and may be returned until all minimum requirements have been met.**

Applications to rent water should be submitted well in advance of the desired start date for the use of water. Rental applications may be submitted as early as November 1 of the year prior to the intended use of rental water. Rental applications submitted more than one year in advance of the proposed start date for water use will not be accepted and will be returned to applicants. Rental applications will not be processed if they are received after the end of the rental season of use.

One rental application per beneficial use of water. One rental application can be submitted if you propose to rent water from multiple sources. For multiple beneficial uses of water, individual rental requests should be submitted for each unique beneficial use of water.

For additional instructions on completing a rental application, visit the Department's website at www.idwr.idaho.gov.

4. RENTAL REQUESTS FOR SPECIFIC WATER RIGHTS

A. Are you requesting to rent specific water rights?

Yes ☒ No ☐

If yes, specify below the water rights you are requesting to rent. Otherwise continue to Section 5 of this application form.

Please note: Diversion rates and volumes to be rented from a leased water right must be proportionate to the per acre diversion rates and per acre volume limits of the water right leased to the Bank. Applicants should query a water right's rental availability by reviewing active lease and rental documents, searchable via IDWR's website, to ensure all elements of a water right remain available in sufficient quantity to satisfy a rental request.

Water rights identified below must either already be leased to the Bank or a lease proposal should accompany the rental request. **Rental requests for water rights not yet leased to the Bank will be returned if companion lease applications are not provided with the rental request.**

For leased rights with combined limits, applicants should request to rent against the combined limit diversion rate, volume or acre limits.

Elements of Water Rights Leased to the Bank (Contract Details)								Leased totals minus water actively engaged in rental agreement equals rental availability	Rental Request		
Water Right Number	Nature of Use	Water Source	Rate (CFS)	Volume (AF)	Acres (AC)	Start (year)	End (year)		Rate (CFS)	Vol. (AF)	Acres (AC)
63-32060	IRRIGATION	GROUND WATER	0.08	39.00	9.8	2015	2019		0.08	39.00	9.8
Applicants must ensure the requested rate per acre and volume per acre do not exceed the rate per acre and volume per acre that have been leased to the Water Supply Bank								TOTAL	0.08 CFS	39.00 AF	9.8 AC

Attach multiple copies of this page if space above is insufficient to list all water rights requested to be rented on this application.

B. If water right conditions, combined limits, or the sum of all water right elements being requested provide an unconventional duty of water (e.g., an unusually low rate per acre or volume per acre for irrigation use), explain how your proposed rental will sufficiently accomplish your intended purposes. Attach a separate page if space is insufficient and label it **Attachment 4B**:
