Re: Application for Transfer of Water Right Nos. 33-2054, 33-2075, 33-2076A, 33-2076B, 33-2119, 33-2125, 33-7007, 33-7061, 33-7053.

Dear Blake:

The enclosed transfer application adds the NW $\frac{1}{4}$ NW $\frac{1}{4}$ of Section 33 T.6N R.30E to the permissible place of use described under the above referenced water rights. A copy of the Corporate Warranty Deed recorded in the official real property records of Butte County, Idaho on December 9, 2013 as instrument no. 0051269 is included to verify the ownership of this parcel of land.

When combined, the above referenced water rights provide for the irrigation of no more than 3,002 acres during any single irrigation season. After the transfer application is approved, we will irrigate 2,881.4 acres within the updated place of use during 2015. The balance of the water rights (3,002 acres – 2,881.4 acres = 120.6 acres) will be leased to the Water Supply Bank.

Under a separate email, I will transmit to you the electronic shape files for the irrigated fields that are shown on the map attached to the enclosed transfer application. Please use the enclosed \$500.00 check to cover your transfer application fee.

Sincerely,

Vic Conrad
