Subject: Notice of Stockwater Stream diversion

Derek,

As per our phone conversation the following changes will be made to your Notice of Diversion as an Alternative to instream stockwater use.

- POD will be updated to the NWSESW $\frac{1}{4}$, $\frac{1}{4}$.
- POU will be updated to the SE SW $\frac{1}{4}$, $\frac{1}{4}$.
- Rate of diversion will be updated to .011 cfs to match the 51 head of cattle that will use the spring.

POD and POU changes are being made to reflect what was indicated on the map sent.

Please reply to this email if you agree to these changes.

Thanks,

Scott R. Bergendorf
