Water Right License

WATER RIGHT NO. 37-21176

Priority: September 11, 2003

Maximum Diversion Rate: 0.68 CFS
Maximum Diversion Volume: 492.0 AF

It is hereby certified that REDCLIFF PARTNERS LP
A CALIFORNIA LTD PARTNERSHIP
567 SAN NICOLAS DR STE 340
NEWPORT BEACH CA 92660
And
DFT PROPERTIES
C/O RANNEY E & MARK P DRAPER
567 SAN NICOLAS DR STE 340
NEWPORT BEACH CA 92660 has complied with the terms and conditions
of the permit, issued pursuant to Application for Permit dated September 11, 2003; and has submitted
Proof of Beneficial Use on October 24, 2005. An examination confirms water is diverted from:

SOURCE

BIG WOOD RIVER

Tributary: MALAD RIVER

and a water right has been established as follows:

<u>BENEFICIAL USE</u>	<u>PERIOD OF USE</u>	<u>DIVERSION RATE</u>	<u>ANNUAL DIVERSION VOLUME</u>
AESTHETIC	01/01 to 12/31	0.68 CFS	492.0 AF
RECREATION	01/01 to 12/31	0.68 CFS	492.0 AF
WILDLIFE	01/01 to 12/31	0.68 CFS	492.0 AF

LOCATION OF POINT(S) OF DIVERSION:

BIG WOOD RIVER SE1/4NE1/4 Sec. 30, Twp 04N, Rge 18E, B.M. BLAINE County

PLACE OF USE: RECREATION, AESTHETIC, AND WILDLIFE

Twp Rge Sec	NE				NW				SW				SE				Totals
	NE	NW	SW	SE	NE	NW	SW	SE	NE	NW	SW	SE	NE	NW	SW	SE	
04N 18E 32						X											

CONDITIONS OF APPROVAL

1. A measuring device and lockable controlling works of a type acceptable to the Department shall be permanently maintained at the point of diversion from the Big Wood River.
2. The right holder shall monitor the effect of return flows on the temperature of the Big Wood River in accordance with the rules and regulations of the Department Environmental Quality and in accordance with the agreement with protestant. The Director may require other water quality monitoring if necessary, to protect the local public interest. Use of water under this right, when combined with other recreational, aesthetic, hydropower, fish propagation or other traditional "non-consumptive uses" of water must not cause a significant degradation of water quality in the Big Wood River and its tributaries.
3. The right holder shall maintain a measuring device and lockable controlling works of a type approved by the Department in a manner that will provide the watermaster suitable control of the diversion.

State of Idaho
Department of Water Resources
Water Right License

WATER RIGHT NO. 37-21176

4. Rights 37-4265, 37-8535, 37-20441 and 37-21176 when combined shall not exceed a total diversion rate of 10.00 cfs.
5. Rights 37-4265, 37-8535, 37-20441 and 37-21176 are also diverted through the point of diversion described above.
6. This right does not grant any right-of-way or easement across the land of another.
7. Use of water under this right may be affected by an agreement between the protestant and the right holder.
8. Use of water under this right will be regulated by a watermaster with responsibility for the distribution of water among appropriators within a water district. At the time of this approval, this water right is within State Water District No. 37.
9. Measuring devices acceptable to the Department shall be permanently maintained at the point of re-diversion from the Cliffside Homeowners Assn. Inc. water system and at the point of discharge to the Big Wood River or a hydraulically connected side channel of the Big Wood River.
10. When delivery of water pursuant solely to this right is not possible because of earlier priority rights, including minimum stream flows, water diverted pursuant to Right 37-4265 may be delivered through the place of use for this right only if: a) losses incurred from the point of diversion from the Big Wood River to the point of discharge of the water diverted under Right 37-4265 are fully compensated, if such compensation is then required for the use of water under Right 37-4265, b) the water is discharged directly to the actively flowing channel of the Big Wood River or into a hydraulically connected side channel of the Big Wood River, and c) mitigation is provided as described below.
11. Water diverted under Right 37-20440 is used in combination with this right to mitigate losses of water resulting from the use of this right. From April 15 to October 31 each year water shall not be diverted under this right except when water is being diverted under Right 37-20440 for mitigation purposes. From November 1 to April 14 each year, water may be diverted under this right without mitigation.
12. Water shall not be diverted under this right when flows in the Big Wood River are below established minimum flow amounts of 189.00 cfs, as established by Rights 37-7919 and 37-8307.
13. Rights 37-20441 and 37-21176 when combined shall not exceed a total annual maximum diversion volume of 1551 af at the field headgate.

This license is issued pursuant to the provisions of Section 42-219, Idaho Code. The water right confirmed by this license is subject to all prior water rights and shall be used in accordance with Idaho law and applicable rules of the Department of Water Resources.

Signed this 19th day of March, 2015.

RE: License Nos. 37-20441 & 37-21176

Issuance of Licenses

Dear Water Right Holder(s):

The Department of Water Resources has issued the enclosed Water Right Licenses confirming that water rights have been established in accordance with your permits. Please be sure to thoroughly review the conditions of approval and remarks listed on your licenses.

The licenses are PRELIMINARY ORDERS issued by the Department pursuant to section 67-5243, Idaho Code. They can and will become final orders without further action by the Department unless a party petitions for reconsideration or files an exception and/or brief within fourteen (14) days of the service date as described in the enclose information sheet.

Please note that water right owners are required to report any change of water right ownership and/or mailing address to the Department within 120 days of the change. Failure to report these changes could result in a \$100 late filing fee. Contact any office of the Department or visit the Department's homepage on the Internet to obtain the proper forms and instructions.

If you have any questions, please contact me at 208-287-4951.

Sincerely,

Pamela Skaggs

Water Rights Supervisor

Enclosure(s)

cc: JAMES P SPECK
WATER DISTRICT #37

CERTIFICATE OF SERVICE

I hereby certify that on March 23, 2015, I mailed a true and correct copy, postage prepaid, of the foregoing PRELIMINARY ORDER (Approved License) to the person(s) listed below:

EXPLANATORY INFORMATION TO ACCOMPANY A PRELIMINARY ORDER

(To be used in connection with actions when a hearing was **not** held)

(Required by Rule of Procedure 730.02)

The accompanying order or approved document is a "Preliminary Order" issued by the department pursuant to section 67-5243, Idaho Code. **It can and will become a final order without further action of the Department of Water Resources ("department") unless a party petitions for reconsideration, files an exception and brief, or requests a hearing as further described below:**

PETITION FOR RECONSIDERATION

Any party may file a petition for reconsideration of a preliminary order with the department within fourteen (14) days of the service date of this order. **Note: the petition must be received by the department within this fourteen (14) day period.** The department will act on a petition for reconsideration within twenty-one (21) days of its receipt, or the petition will be considered denied by operation of law. See Section 67-5243(3) Idaho Code.

EXCEPTIONS AND BRIEFS

Within fourteen (14) days after: (a) the service date of a preliminary order, (b) the service date of a denial of a petition for reconsideration from this preliminary order, or (c) the failure within twenty-one (21) days to grant or deny a petition for reconsideration from this preliminary order, any party may in writing support or take exceptions to any part of a preliminary order and may file briefs in support of the party's position on any issue in the proceeding with the Director. Otherwise, this preliminary order will become a final order of the agency.

REQUEST FOR HEARING

Unless a right to a hearing before the Department or the Water Resource Board is otherwise provided by statute, any person aggrieved by any final decision, determination, order or action of the Director of the Department and who has not previously been afforded an opportunity for a hearing on the matter may request a hearing pursuant to section 42-1701A(3), Idaho Code. A written petition contesting the action of the Director and requesting a hearing shall be filed within fifteen (15) days after receipt of the denial or conditional approval.

ORAL ARGUMENT

If the Director grants a petition to review the preliminary order, the Director shall allow all parties an opportunity to file briefs in support of or taking exceptions to the preliminary order and may schedule oral argument in the matter before issuing a final order. If oral arguments are to be heard, the Director will within a reasonable time period notify each party of the place, date and hour for the argument of the case. Unless the Director orders otherwise, all oral arguments will be heard in Boise, Idaho.

CERTIFICATE OF SERVICE

All exceptions, briefs, requests for oral argument and any other matters filed with the Director in connection with the preliminary order shall be served on all other parties to the proceedings in accordance with IDAPA Rules 37.01.01302 and 37.01.01303 (Rules of Procedure 302 and 303).

FINAL ORDER

The Director will issue a final order within fifty-six (56) days of receipt of the written briefs, oral argument or response to briefs, whichever is later, unless waived by the parties or for good cause shown. The Director may remand the matter for further evidentiary hearings if further factual development of the record is necessary before issuing a final order. The department will serve a copy of the final order on all parties of record.

Section 67-5246(5), Idaho Code, provides as follows:

Unless a different date is stated in a final order, the order is effective fourteen (14) days after its service date if a party has not filed a petition for reconsideration. If a party has filed a petition for reconsideration with the agency head, the final order becomes effective when:

- (a) The petition for reconsideration is disposed of; or
- (b) The petition is deemed denied because the agency head did not dispose of the petition within twenty-one (21) days.

APPEAL OF FINAL ORDER TO DISTRICT COURT

Pursuant to sections 67-5270 and 67-5272, Idaho Code, if this preliminary order becomes final, any party aggrieved by the final order or orders previously issued in this case may appeal the final order and all previously issued orders in this case to district court by filing a petition in the district court of the county in which:

- i. A hearing was held,
- ii. The final agency action was taken,
- iii. The party seeking review of the order resides, or
- iv. The real property or personal property that was the subject of the agency action is located.

The appeal must be filed within twenty-eight (28) days of this preliminary order becoming final. See section 67-5273, Idaho Code. The filing of an appeal to district court does not itself stay the effectiveness or enforcement of the order under appeal.

MEMORANDUM

TO: File 37-20441 and 37-21176

FROM: Daniel Nelson – Staff Hydrologist

DATE: December 15, 2014

SUBJECT: Licensing Review for 37-21176 and 37-20441

This is the licensing review of the field exam submitted by Sandy Hemenway formerly in our state office. The field exam was done in June 26, 2012. The system associated with this permit allowed water to be diverted directly from the Big Wood River through the Comstock Ditch to a couple of ponds. Permit 37-21176 was initially filed to allow a portion of the water diverted from the Comstock ditch to flow through the pond, and water right 37-20441 was filed to allow all of the tail water from the Comstock Ditch to run through these ponds. The reason behind this is because the outflow from the pond provided a better outflow into the Big Wood River than the outflow structure from the Comstock Ditch. The field exam has some issues that need to be addressed to prior to licensing of the permit.

Diversion Rate:

Ms. Hemenway claims to have measured the point of diversion at 69.23 cfs at the time of her field exam at the point of diversion for the Comstock Ditch. A review of the Water District 37 records shows the highest diversion rate ever recorded in the Comstock Ditch was 15.64 cfs on April 9, 2012. The Water District records show that on the day Ms. Hemenway was at the site (June 26, 2012), the flow rate recorded was 9.54 cfs.

Ms. Hemenway also measured the outflow measurement device and measured 6.50 cfs. Canal managers generally claim that 30% of the flow is lost down ditches and canals in their system. If you divide the outflow measurement of 6.50 cfs by the water district measurement of 9.54 cfs, the result would be that 68% of the water diverted into the Comstock Ditch was delivered to the outflow measurement point. The majority of the water rights in the Comstock Ditch are for storage water rights, so losses of the water diverted into the Comstock Ditch and the ponds could be around the 30% loss amount. Therefore, I have to discount Ms. Hemenway's measurements, and use the measurements made by the Water District.

These two permits were filed to cover the maximum flow of the Comstock ditch. The permits when combined total 10.00 cfs. My review of the Water District diversion records for the Comstock ditch show that 10.6 cfs was diverted in 1991, 11.40 cfs was diverted in 1995, and 15.64 cfs was diverted in 2012. However, during the development period of the permit between 2001 through 2005, the diversion rates recorded for the Comstock Ditch never exceeded 5.68 cfs.

The ponds are set up to carry all of the water from the Comstock Ditch. Apparently there have been some problems carrying water through the discharge pipe for water right 37-8535, so these water rights were filed to allow all of the water delivered through the Comstock Ditch to be diverted through these ponds and through the open discharge ditch. This eliminated the issues with the pipeline for water right 37-8535.

The development period for this permit is between 2001 and 2005. Unfortunately, the system did not operate at the maximum capacity of the ditch or 15.64 cfs during the development period. The maximum flow rates recorded per year during the development period are as follows:

2001 – 4.00 cfs

2002 – 4.00 cfs

2003 – 5.68 cfs (5.68 cfs is the maximum flow rate recorded during the development period)

2004 – 5.68 cfs

2005 4.58 cfs

With the information that is available, we have to limit the diversion rate for water right 37-20441 to 5.00 cfs and the diversion rate for 37-21176 to 0.68 cfs. When these rights are combined with all other rights in the Comstock Ditch, they should be limited to the 10.00 cfs that is allowed to be diverted through this point of diversion.

Diversion Volume:

According to Ms. Hemenway, Pond #1 has a capacity of 0.3 af and Pond #2 has a capacity of 2.5 af. It appears as though these permits were issued using the 24 Hour rule for filling pond. With a total of 2.8 af pond capacity, a diversion rate of 5.00 cfs would more than fill and empty a pond within a 24 Hr period. Water right transfer 69282 was filed on water right 37-20440 to provide the mitigation for the amount of water consumed through evaporation and seepage for these ponds. Therefore, the total amount of water associated with these ponds that need to be accounted for by these permits is the flow through water. Once again, there is no data in the field report that gives an annual volume of water diverted through the ponds.

Therefore, I once again needed to use the Water District records for the Comstock Ditch. The Water District records show the following annual volumes delivered to the Comstock Ditch:

2001 – 1290 af

2002 – 1363 af

2003 – 1546 af

2004 – 1551 af (1551 af is the maximum volume recorded during the development period)

2005 – 1421 af

Although the full volume of water diverted from the point of diversion doesn't actually reach the ponds for this permit, it is the best information that is available. This volume will also be measured at the head of the ditch in the future, so as far as the maximum allowable volume, we will need to limit this use to the maximum volume recorded of 1551 af.

Water right 37-20441 will have a diversion rate that is limited to 5.00 cfs. At this diversion rate, that maximum amount of water that can be diverted through the system is 3620 af in a year ($5.00 \times 1.9835 \times 365 = 3620$). The maximum volume of water delivered during the development period was 1551 af, so water right 37-20441 should be limited to 1551 af. Water right 37-21176 will have a diversion rate that is limited to 0.68 cfs. At this diversion rate, that maximum amount of water that can be diverted through the system is 492 af in a year ($0.68 \times 1.9835 \times 365 = 493$ af). When water rights 37-20441 and 37-21176 are combined should be limited to a maximum diversion volume of 1551 af.

Points of Diversion:

Ms. Hemenway used the GPS'ed and recorded headgate spatial data point for the Comstock Ditch to determine the point of diversion for this permit. I agree with the point of diversion location.

Place of Use

Ms. Hemenway provided a mapping place of use for one of the ponds that straddles the Section 31 and Section 32 dividing line. In Ms. Hemenway's field exam report, she describes the place of use as being totally in the Section 32. I reviewed the permit, and the map in the permit is very vague as to where the ponds are located, and do suggest that the ponds could be in either Section 31 or Section 32. I feel we need to get the place of use corrected and have both water rights amended to show the place of use in both sections. .

Conditions:

Both water right 37-20441 and 37-21176 had similar condition. The conditions for these rights should be the same. 1551The conditions were a bit tricky, but we have decided to make the following recommendations:

Keep conditions 004, 020, and R05. Remove conditions 081, condition 9. Add condition R43 and X36. We did make some corrections to the conditions. Water right 37-8278 was disallowed, so we used the decreed version of this right 37-4265. We also removed any mention of the Snake River Basin Adjudication, since all of the files involved with this permit have been decreed.
