

MEMORANDUM

TO: File 95-11136

FROM: Daniel Nelson – Staff Hydrologist

DATE: March 3, 2015

SUBJECT: Proof of Beneficial Use Review

This file was given to me to review the possible beneficial use because it was a possible in-house review. Per the memo dated 10/1/2014, this permit needs to be field examined with water right other water rights that possibly use the same well.

There is clear evidence that at least a portion of property was irrigated in-front of the home. Please refer to the 2013 aerial photo that shows the tax lot outlined in blue.

This permit should follow the standard procedure for acceptance of late proof.

The USDA-FSA Aerial Photography Field office asks to be credited in derived products.
