STATE OF IDAHO
License and Certificate of Water Right

Water License No. 14679
Water District No. 11B

Amount 4.0 sec. ft.
Priority - 2-9-1920.

THIS IS TO CERTIFY that Drainage District No. 1, of Blaine County, Idaho, (Kilpatrick Brothers Company, a Nebraska Corporation, Henry Smith, H. C. Randall, C. L. Randall, C. O. Thompson, N. B. Buckler, W. R. Patterson, State of Idaho, Irvin Land & Cattle Co., A. Erickson, A. W. Baldwin, A. H. Froehlich, J. J. Froehlich, Horace White, S. L. Martin, E. H. Sowers, J. L. Freeman Estate), whose postoffice address, except State of Idaho, is Picabo, County of Blaine, State of Idaho, made application for a permit to appropriate the public waters of the State of Idaho, dated February 9, 1920; that Permit No. 14679 was issued under said application; that Certificate of Completion of Works, with a carrying capacity of 4.0 second feet, was issued thereunder on October 19, 1923, showing that said works were completed on the 10th day of February, 1923; and that on the 10th day of February, 1923, said Drainage District No. 1, of Blaine County, Idaho, made proof to the satisfaction of the Commissioner of Reclamation of the State of Idaho of a right to the use of the waters developed from an unnamed stream, or channel constructed by said applicants and by them made tributary to Silver Creek, for the purpose of irrigation and domestic use under Use Permit No. 14679, of the Commissioner of Reclamation of the State of Idaho, and that said right to the use of the said waters has been perfected in accordance with the laws of the State of Idaho, and is hereby confirmed by the Commissioner of Reclamation of the State of Idaho and entered of record in Volume 6 of Licenses, at page 3098 on the 19th day of October, 1923;

The right hereby confirmed dates from February 9, 1920;

The points of diversion are located in the NE $\frac{1}{4}$ NW $\frac{1}{4}$ Sec. 30, and the SW $\frac{1}{4}$ SE $\frac{1}{4}$ Sec. 20, in Twp. 1 South, Range 20 E., B. M. County of Blaine.

That the amount of water to which such right is entitled and hereby confirmed, for the purposes aforesaid, is limited to an amount actually needed and beneficially used for said purposes, and shall not exceed 4.0 cubic feet per second.

Description and Location of Use.

All Land in T. 1 S., R. 20 E., B. M. Blaine Co., Idaho.

APPLICATION FOR PERMIT TO APPROPRIATE THE PUBLIC WATERS OF THE STATE OF IDAHO

37-2405

Application No. 20671
Permit No. 14679
District No. 11-B

1. Name of Applicant: Drainage District No. 1 of Blaine Co. Idaho.

Postoffice address: Picabo County: Blaine State: Idaho.

- I. If applicant is a corporation, give: Kilpatrick Brothers Company, a Nebraska Corporation,
(a) Date and place of incorporation: which has complied with the laws of the State of Idaho, in-
(b) Amount of capital stock: corporated many years, amount of capital stock \$50,000, all
(c) Amount paid in: paid in, names of directors, W.H.Kilpatrick, R.J.Kilpatrick,
(d) Names and addresses of directors: S.D.Kilpatrick, and address of all directors is Beatrice, Neb; Henry Smith, H.C.Randall, C.L.Randall, C.O. Thompson,
II. The financial resources of the applicant are: (a) Cash on hand: N.B.Buckler, W.R.Patterson, State
(b) Treasury stock: (c) Bonds to be issued: of Idaho, Irvin Land and Cattle Co.,
(d) Other resources: A. Erickson, A.W.Baldwin, A.H.Froelich, J.J.Froelich, Horace White, S.L.Martin, E.H.Sowers, J.L.Freeman estate, each per-

2. Quantity of water claimed: 50 cubic feet per second.) after deacribed as to those of the
3. Source of water supply: unnamed stream which is not now but) sign and are above named for use on the
as herein explained will be a) respective lands of such persons not
tributary of Silver Creek.) signing, address of all the foregoing
4. Location of point of diversion: A- S.38;05' W. 1320 feet distant from the persons, except
between 19&30 B- N.45°00' E. 1056 the State of
corner/ of Section 20&29 , T. 1 S. , R. 20 E. , B. M., and is in the NE 1/4 NW 1/4 Idaho, is Picabo
of Section 30-20 , T. 1 S. , R. 20 E. , B. M., County of Blaine. SW 1/4 SE 1/4 Idaho.

5. Water is to be used for: Irrigation and Domestic Use.

6. If for mining, milling, power or manufacturing purposes, give:

- (a) Point of use of water: feet distant from corner of Section
T. , R. , B. M., in the of Section , T. , R. , B. M.
(b) Amount of power generated: H. P., under feet head.
(c) Water is to be returned to at a point feet
distant from the corner of Section , T. , R. , B. M., in the
of Section , T. , R. , B. M.

7. Estimated cost of works: \$50,000

8. Kind of works: Dams and Ditches.

9. Height of dam A- 7.5 feet; length of dam at top 225 feet; length of dam at bottom 125
B- 4.5 300 300
feet; material used in dam Earth fill.

10. Size of headgate: Width A-10 feet; height 3 feet.
B- 8 3

11. Ditch: Width at bottom A 16 feet; width at water line 22 feet; depth of water 3
B 10 14 2.5
feet; dimensions of flume

Diameter of pipe inches; length of conduit 13 miles.
Average grade per mile 2 feet.
2

12. The time required for the completion of such work is 5 years.

13. The time required for the complete application of the water to the proposed use is 2 additional years.

14. The land to be irrigated is described in the following tabulation: See Remarks.

15. (a) Is reservoir to be used? **No.** If so, fill in (b) and (c) below.
 (b) Name of reservoir and number of Storage Permit:
 (c) Date of filing of Application for Storage Permit and Name of Applicant:

BE IT KNOWN THAT the undersigned hereby makes application for permit to appropriate the public waters of the State of Idaho as herein set forth.

IRVIN LAND AND CATTLE CO.

APPROVAL OF STATE ENGINEER

The number of this permit is 14679
Recorded in Book 52 Page 14679 Approved May 12, 1920.
This is to certify that I have examined the within application for a permit to appropriate the public waters of the State of Idaho,
and hereby approve the same, subject to the following limitations and conditions:
Bond in the sum of \$ 1000.00 to be filed on or before July 11, 1920.
Work to begin on or before and to continue diligently and uninterruptedly to completion,
unless temporarily interrupted by circumstances over which permit holder has no control.
One-fifth of the work above specified to be completed on or before November 12, 1922.
The whole of said work to be completed on or before May 12, 1925.
Beneficial use of water appropriated in accordance herewith, to be made on or before May 12, 1927.

Witness my hand this 12th day of May, 1920.

W. G. Swendsen,
State Engineer.
Commissioner of Reclamation.

Remarks:

14 Twp	Range	Sec.	NE¼				NW¼				SW¼				SE¼				Totals
			NE¼	NW¼	SW¼	SE¼	NE¼	NW¼	SW¼	SE¼	NE¼	NW¼	SW¼	SE¼	NE¼	NW¼	SW¼	SE¼	
			REMARKS The water applied for is to be developed by means of a system of deep drains. It is proposed to empty this water into Silver Creek at the point designated on the accompanying map as "Point of return Flow" which point bears N. 76°55' E. 2175 ft. from the quarter corner between Secs. 26 and 35 of T. 1 S. R. 20 E. B. M. It is further proposed to divert from Silver Creek at the points described in this application as "Points of Diversion" an amount equivalent to that developed by the drainage system. The lands to be served by each diversion are designated on the map. The amount of water to be developed is described under the following classification. <u>1st. Classification.</u> A considerable portion of the water developed by and flowing in said system of drains and thereby emptied into Silver Creek will consist of waters arising solely from waters of Silver Creek heretofore lawfully appropriated by the owners of said above described lands and appurtenant to said lands and used in the irrigation thereof as to such portion of said waters so developed the right of recapture and reuse is claimed: and permission is requested to take from Silver Creek at the points of divers aforesaid for irrigation of said lands a quantity of water equal to the amount of such water appropriations so recaptured. <u>2nd. Classification.</u> A considerable portion of the water so developed and emptied into Silver Creek will consist of water which is now and heretofore has been swamp and seepage waters natural in the soil and sub formations of the aforesaid lands, but which on account of faults fissures in the underlying lava rock formation has heretofore been lost by subterranean channels and therefore never has been tributary to Silver Creek, and will be by said system of drains for the first time developed and made available for use. <u>3rd Classifaction.</u> A considerable portion of the water so developed and emptied into Silver Creek will consist of water which is now and heretofore always has been in the soil of said land but which on account of conditions heretofore existing has been lost by evaporation on account of the level of the water table being at or near the surface of the ground thr out the above described lands: but by the said system of drainage the water table unde said lands will be lowered several feet, and thereby evaporation of said waters materi decreased, and all such waters so saved have heretofore never been tributary to Silver Creek or to any other stream, but have been always lost be evaporation, and by the mea aforesaid for the first time made available. The amounts of water so arising from the several sources can not now be definitely determined and time and careful investigatio will be necessary to determine such quantities with any degree of accuracy, but the to it is belived will amount to the 50 sec. ft. herein before specified.																

As to the waters arising under the first classification the ownership thereof is claimed for and is in the said land owners of said respective lands, and permission as to the places of diversion and use thereof is hereby requested; but as to waters arising by said development under the second and third classifications aforesaid an original appropriation is hereby claimed of such waters and with permission to divert the same from Silver Creek at the points of diversion aforesaid for the irrigation of the lands aforesaid pro rated according to the percentages as set opposite each tract in the list of irrigable lands on page 2, as these percentages represent the pro rata amount which each owner is assessed for the cost of development. It is also requested that water arising under the second and third classification aforesaid be allotted to the applicants herein as prior to the rights of any other persons whomsoever, and not subject to be interfered with in matters in relation to priority, but it is further suggested that as to all lands aforesaid to which waters arising under the second and third classifications are allotted, that a requirement be made that where such allotment with previous rights appurtenant to and owned with such lands exceeds one inch to the acre, that the owners of such lands either relinquish or transfer to other lands under approval of the State Reclamation Commissioner such portion of the waters now appurtenant to and owned by the above described lands as that after such transfer or relinquishment, the total amount of water decreed, allotted appurtenant and owner with such lands shall not exceed one fiftieth of one cubic foot per second of time, per acre of irrigable land pro rated according to the percentage as set opposite each tract of land in the list of irrigable lands set forth on page 2 of this application, as aforesaid

All land in T. 1 S. R. 20 E. B. M. Blaine Co., Idaho.

License issued for 40 second feet

MEMORANDUM

Date: April 21, 1998

To: Files

From: Jim Johnson

Subject: Request to Amend Approved Transfer 5046

=====

On March 20, 1998 the Department approved the above referenced transfer containing the following condition.

This right when combined with all other rights shall provide no more than 0.02 cfs per acre nor more than 3.5 afa per acre at the field headgate for irrigation of the lands above.

On April 6, 1998 Chuck Brockway, representing the transfer applicant contacted me concerning the condition, pointing out that it was inconsistent with the rates of diversion per acre listed on the transfer.

I have reviewed the matter and after discussing various alternatives with my supervisor we have elected to remove the condition.

An amended transfer approval has been prepared and an amended preliminary order will be issued.

FROM: PAM SKAGGS^{CS}/STATE OFFICE

SUBJECT: TRANSFER 5046

DATE: February 26, 1998

=====

This is the third of three (3) transfers filed by the applicant to more fully describe the use of these 33 surface water rights on the 2711.3 acre place of use. These rights are used in conjunction with the three (3) groundwater rights under Transfers 5044 & 5045; 37-02617, 37-02620 and 37-02627A. The transferred groundwater rights describe the same common place of use.

The transfer creates a combined permissible place of use, adds all diversion points, and identifies both Silver Creek and Loving Creek as sources under each right. Season of use and total diversion volume were adjusted to current standards. Domestic use found on some of the rights was changed to reflect historic stockwater use. The extent of the stockwater use was provided by the applicant's representative and maximum limits identified in conditions of approval.

Recommended conditions include Watermaster control, measuring devices & lockable controlling works, irrigation overlap, future impact or injury, multiple points of diversion, combined limits, use in conjunction with groundwater, right-of-way, no new diversion headgates and standard transfer conditions.

Re: Permit No. 14679
Drainage District No. 1
Blaine County.

Messrs. Sullivan, Sullivan & Van Winkle,
Attorneys at Law,
Bailey, Idaho.

Gentlemen:

We are enclosing herewith Certificate of Completion of Works, issued under the above numbered Permit, together with Water License. Receipt for fees is also enclosed.

Very truly yours,

W. G. SWENDSEN

Commissioner of Reclamation

By

Chief Clerk.

14679

In Re: Permit ~~14679~~ Memo.
Proof of Beneficial Use.

In a consideration of the proof offered under Permit No. 14679, a protest against the issuance of license was filed by the Big Wood River Canal Company through their attorney W. G. Bissell.

In order to obtain facts regarding this permit, the undersigned Commissioner of Reclamation conducted a field examination and convened a hearing at Picabo, at which the permit holder and protestant were represented. John Badley, Manager of the Big Wood River Canal Company, represented the protestant and these gentlemen, together with the Watermaster, Mr. Chapman, accompanied the undersigned over the ground.

The protest was based upon the allegation that the water sought to be appropriated under the permit was really the water that had been developed by the construction of drains, but that the said water had at all times prior to the construction of said drains found its way into Silver Creek and was thus available to and had been appropriated by protestant.

After the field examination and during the process of the hearing the permit holder's representatives and protestant agreed that a license of four second of water might be issued under the said permit. Upon a consideration of the said agreement, it was found to be equitable and the four second feet is thought therefore, as nearly as may be determined the actual quantity of water permit holder has applied to beneficial use and developed through the construction of the said drains.

(Special Order when license is issued)

Commissioner of Reclamation.

Department of Reclamation,
Boise, Idaho.

Gentlemen: RE: APPLICATION NO. 20671. DRAINAGE DISTRICT
NO. 1, Blaine County, et al.

Pursuant to your recent favor, we are enclosing herewith draft issued by Picabo State Bank in favor of W.G. Swendsen, Commissioner, for the sum of \$98.00 in payment of the fees of your office in connection with the issuance of certificate of completion of works and the license under the above permit.

The application in this instance was made by numerous parties owning lands within the drainage district, the wording in the body of the application being to the effect that it was made by the parties named "each personally for and in behalf of his respective lands hereinafter described as to those of the above named who sign, and in behalf of and for the use of those who do not sign and are above named for use on the respective lands of such persons not signing". This application was then signed by the District, by Sloan as agent, not only as agent for the district, but as agent for all applicants named in the body of the application.

In view of the fact that the reclamation which resulted in the development and saving of the water in this case cost a great many thousand dollars, and has been a costly venture on the part of the land owners, we believe, for all purposes in the future, the license should issue in the name of the land owners, so that their rights will be clearly established of record. Once this is done the respective rights of the land owners will pass by conveyance of the land with certainty and the possibility of litigation as to these rights will be reduced to a minimum.

Section 5579. Compiled Statutes, reads in part as follows: "Such license shall be issued under the seal of the office of the department of reclamation, and shall state the NAME and post office address of such USER," etc. "such license shall give a description, by legal subdivisions, of the land which is irrigated by such water" etc.

Section 5580 Reads, in part, "Such license shall be binding upon the state as to the right of such LICENSEE to use the amount of water mentioned therein, and shall be prima facie evidence as to such right" etc.

We believe that the form of the license enclosed herewith, by way of suggestion, will protect the land owners, and comply with the statute, and at the same time make a comparatively simple record in your office, and, we would be in a position to furnish blue prints such as the one attached to the enclosed form of license, should you desire them in making your record.

We would be glad to hear from you on this matter. As we understand it the license will issue for $6\frac{1}{2}$ cubic feet, as shown by the proof.

Very truly yours,
SULLIVAN, SULLIVAN & VAN WINKLE

R:V

PER *R.V.W.*

P.S. We would appreciate it if you would notify us when the license is issued, or, send same to us here at Hailey.

Re: Permit No. 14679
Drainage District No. 1.

Mr. Roy Van Winkle,
Attorney at Law,
Hailey, Idaho.

Dear Sir:

The report of the examining engineer on completion of works and beneficial use of water under the above numbered permit has been received. Upon receipt of fees in the sum of \$98.00, the certificate and license will be issued. The fees are \$5.00 for the Certificate and \$1.00 for each forty-acre tract or fraction.

Very truly yours,

W. G. SWENDSEN,
Commissioner of Reclamation

By

Chief Clerk.

14679

REPORT OF ENGINEER

This proof is for COMP. WORKS & BEN. USEIn Water District No. 11-B

1. State name of applicant and number of permit: Drainage Dist. No. 1- Permit 14679
2. State source of water supply: Developed water from an unnamed stream, or channel constructed by applicants, entering Silver Creek.
3. Location of point of diversion: NE $\frac{1}{4}$ NW $\frac{1}{4}$ Sec. 30 and SW $\frac{1}{4}$ SE $\frac{1}{4}$ Sec. 20 of 1 S., R. 20 E., B.M.

4. Describe works as they exist, giving dimensions and capacities of same:

*Drainage Canals from 6' to 8' wide on bottom and est 3' to 10' depths
Length as shown on blue print map inclosed except that B. drain
extends in straight line to P. of diversion mentioned in description
above.*

5. State whether or not water has been turned into works of diversion:

Yes

6. Give exact location of lands to be irrigated. If proof is for beneficial use, give exact number of acres under cultivation in each forty-acre tract. (Describe manner and place of use if for other than irrigation): All portions of Secs. 15, 16, 20, 21 & 22, S. of Silver creek, and of Sec. 29, between Silver Creek and the Kilpatrick canal and all of Sec. 28 (except SE $\frac{1}{4}$ & S $\frac{1}{4}$ NE $\frac{1}{4}$) and all of Sec. 27 S. of Silver creek (except portion thereof S. of south boundary of O.S.L.R.R. Co. Right of Way, but including NW $\frac{1}{4}$ SW $\frac{1}{4}$) and all of Sec. 26 between Silver creek and north boundary of said R.R. Right of Way west of County road near the center line of said Sec. 26, all in Twp 1 S., R. 20 E., B.M. in Blaine County, Idaho

7. Submit map on enclosed plat, showing location and details of above description.

8. How many parties conduct water in this system? See list inclosed

9. Give names and amount of each right:

Except that rights of names checked have reverted back to Kilpatrick Bros. Co.

10. What large stream would the water here appropriated finally reach? Silver Cr. (Possibly)

11. Describe the various tributaries en route, from point of diversion to the principal drainage stream:

*(My opinion License should be granted. Water seeps into canals
their entire length. Also waste water from fields runs into canals
which would other wise pond up and form swamps.)*

Remarks: *Parties interested use water developed & stored as supplementary water
right on lands now irrigated when late rights are shut off.
Est. 300 inches of water on this date. Varies from time to time.*

This examination was made on the 15 day of July 19 23

(Signed)

E. J. Sutcliffe

Examiner.

Instructions to Examiners

1. Examiners will not be permitted to examine any of the receipts in the office pertaining to this permit. They are to furnish a report of the facts and conditions as they exist, from their own observations and inquiries.
2. Always carefully note the location of the point of diversion, and accurately plat same.
3. Find out how many parties own right in the ditch or canal and give their names and amount of right.
4. When proof is for beneficial use, carefully check up the number of acres actually irrigated in each forty and accurately plat same.
5. Make a map showing the correct location of streams and ditches, and the irrigated lands, and any adjacent permanent landmarks, such as towns, lakes, large streams and public roads.
6. If any unusual conditions are discovered, make a plain statement of them under re-marks.
7. Always see the holder, if possible, and go over the whole ground with him, and make your report only upon actual existing facts and conditions.

(This report must be sworn to when not made by an attache of the office.)

Blaine County

Mr. Roy Van Winkle,
Attorney at law,
Hailey, Idaho.

Dear Sir:-

Depositions and affidavit of publication for proof of completion of works and beneficial use of water under the above permit were received at this office February 13th. These will be placed on file pending the examination by an engineer from this office later in the season. It will probably be a matter of sixty days before this examination can be made. You will be further advised in the matter at that time.

Very truly yours,

W. G. SWENDSEN,

Commissioner of Reclamation.

(Signature)

Subscribed and sworn to before me this 31st

day of January, 1923

NOTICE OF PROOF OF COMPLETION OF WORKS AND APPLICATION OF WATER TO BENEFICIAL USE.

Notice is hereby given that at 10 o'clock A. M. on the 10th day of February, 1923, at Hailey, County of Blaine, State of Idaho, before Roy Van Winkle, Notary Public, proof will be submitted of the completion of works for the diversion of ten cubic feet per second of developed waters of an unnamed stream or channel, constructed by applicants, entering Silver Creek in the SE 1-4 SE 1-4 Sec. 26, Tp. 1 S., R. 20 E., B. M. and of the application to beneficial use of said water in accordance with the terms and conditions of Permit No. 14679, heretofore issued by the Commissioner of Reclamation of the State of Idaho.

1. The name and postoffice address of person or corporation, holding said permit, are Drainage District No. 1 of Blaine County, Idaho, Picabo, Idaho. Kilpatrick Brothers Company, a Nebraska Corporation. Henry Smith, H. C. Randall, C. L. Randall, C. O. Thompson, N. B. Buckler, W. R. Patterson, State of Idaho, Irvin Land and Cattle Co., A. Erickson, A. W. Baldwin, A. H. Froehlich, J. J. Froehlich, Horace White, S. L. Martin, E. H. Sowers, J. L. Freeman Estate, address of said persons, except State of Idaho, is Picabo, Idaho.

2. Said works of diversion will be fully completed on the date set for such completion, and the amount of water which said works are capable of conducting to the place of use, in accordance with the plans accompanying the application for such permit, is fifty cubic feet per second.

3. The use to which said water has been applied is irrigation and domestic purposes and the amount applied to beneficial use is ten cubic feet per second.

4. The place where said water is used is on all portions of Secs. 15, 16, 20, 21, 22 south of Silver Creek and of Sec. 29 between Silver Creek and the Kilpatrick Canal and all of Sec. 28 (except S 1-2 SE 1-4 and S 1-2 NE 1-4 SE 1-4) and all of Sec. 27 south of Silver Creek (except portion thereof south of south boundary of O. S. L. RR. Co. Right of Way but including N 1-2 NW 1-4 SW 1-4) and all of Sec. 26 between Silver Creek and north boundary of said Railroad Right of Way west of County Road near the center line of said Sec. 26. All in Tp. 1 S., R. 20 E., B. M., in Blaine County, Idaho.

5. The date of priority which said user is prepared to establish is February 9th, 1920.

W. G. SWENDSEN,
Commissioner of Reclamation.
1-4-25

PERMIT NO. 14679

Proof of Completion of Works

DEPOSITION OF HOLDER

Ques. 1. State your name, age, residence, occupation and postoffice address.

Ans. H. H. Neal, age 36 years, banker, Picabo, Idaho.

Ques. 2. If acting in behalf of a corporation, state its name, principal place of business, your position with reference to same, and your authority for appearing in its behalf.

Ans. Acting on behalf of Drainage District No. 1, Blaine County, Idaho, as Secretary of this District.

Ques. 3. State number and date of permit, amount of water you are authorized to divert, source, and point of diversion.

Ans. Permit No. 14679, date May 12th, 1920. Authorized to divert 50 cubic feet per second. One point of diversion in NE $\frac{1}{4}$ NW $\frac{1}{4}$ Sec. 30, and one in SW $\frac{1}{4}$ SE $\frac{1}{4}$ Sec. 20 T 1 S R 20 E. B. M.

Ques. 4. State purpose for which water is to be used, and, if for irrigation, state the number of acres and give description of the land you intend to reclaim.

Ans. For irrigation purposes of the lands described on page two of the application.

Ques. 5. State whether or not the water has been turned into your works of diversion, and, if so, when and to what extent.

Ans. During the year 1922, 200 inches of developed water, and about 125 inches of surface waste water.

Ques. 6. State whether or not the works of diversion are fully completed, and whether or not they comply in all respects with the terms of the permit.

Ans. All works are completed and comply with the permit.

Ques. 7. If the works of diversion do not comply with all the terms of your permit, state fully those particulars in which there is any variance.

Ans. _____

Ques. 8. Give description of works, state dimensions and capacity of each part, and give cost of same.

Ans. ~~xxxxxx~~ system of open drains. Drain A 16 ft on bottom; 22 ft at water line; depth of water 3 ft. Drain B 10 ft on bottom; 14 ft at water line; depth of water 2.5 ft. Cost of system \$65000.00.

The Depositions of two Witnesses, in this form, taken separately, required in each case.

PERMIT NO. 14679

Proof of Completion of Works

DEPOSITION OF WITNESS

Ques. 1. State your name, age, residence, occupation and postoffice address.

Ans. W.H. Kilpatrick Jr. Age 31 years, merchant, Picabo, Idaho

Ques. 2. Are you acquainted with _____, the holder of Permit No. 14679, authorizing the diversion of 50 cu. ft. per second ~~per~~ of the waters of an unknown stream, at Picabo, Idaho for irrigation purposes? How long have you known him, and where does he reside?

Ans. I am. Have known these holders for years.

Ques. 3. Have you read or heard read said Permit No. 14679, and are you familiar with its terms and conditions?

Ans. Yes

Ques. 4. (If for irrigation purposes). Are you acquainted with the land proposed to be irrigated under said permit? If so, describe same, state its character, and give your estimate of the amount of water required for its profitable cultivation.

Ans. Yes. It is the land described on page 2 of the application for this permit. Mostly a sandy-clay-loam, and requires at least one inch per acre for profitable cultivation.

Ques. 5. Are the works of diversion fully completed and of sufficient capacity to convey the entire amount of water set out in the permit from point of diversion to place of use?

Ans. Yes

Ques. 6. Describe the works of diversion as they now exist, and give your estimate of their capacity.

Ans. Dams and open ditches. One ditch conveys about 40 second feet, and the other about 10 second feet.

(Sign here.) W.H. Kilpatrick Jr.

I hereby certify that the foregoing testimony was read to the above subscriber before its signing, that I believe him to be the person he represents himself to be, and that said testimony was subscribed and sworn to before me, at my office in Hailey, County of Blaine, State of Idaho, on this 18th day of February A. Hailey Idaho

PROOF OF COMPLETION OF
WORKS.

- Question #1. James B. Hays, Age 34, Residence and Postoffice address, Boise, Idaho. Occupation Civil Engineer.
- Question #2. As an employee of the Drainage District I became acquainted with nearly all of the ~~holders~~ signers of the application, of Permit No. 14679 authorizing the diversion of 50 second feet. First got acquainted with several of them in the Fall of 1919.
- Question #3. Yes.
- Question #4. Am well acquainted with the land it is proposed to irrigate under this Permit. The soil ranges from a clay-loam to a sandy-clay-loam. The top soil averages two feet thick and is underlain with gravel, and in the south and east it covers a lava flow. 1" Water required.
- Question #5. The works for diversion have been fully completed for a number of years and are being used to divert water under prior Permits. The diversion works are sufficiently ample to divert the water called for.
- Question #6. Diversion "A", known locally as the head of the Kilpatrick Canal consists of a wooden overflow dam and earth embankments, and a wooden headgate with submerged orifice. I have known the canal to carry 42 sec/ft. Diversion "B", known locally as the Iden Ditch has a rock fill dam, with logs or boards to check up the flow of Silver Creek and a standard submerged headgate. I ~~xxxxxx~~ have known this ditch to carry 10 sec/ft and the capacity could readily be increased to 15 or possibly 20 sec.ft. The two canal systems operating together are amply sufficient to carry the water under this Permit.
- The works described in the Application upon which this permit is based have been fully completed as set forth in the application.

14679

PERMIT No 14679**Proof of Application of Water to Beneficial Use****DEPOSITION OF HOLDER**

Ques. 1. State your name, age, residence, occupation and postoffice address.

Ans. attached

Ques. 2. If acting in behalf of a corporation, state its name, principal place of business (if a foreign corporation, give name and postoffice of statutory agent), your position with reference to same, and your authority for appearing in its behalf.

Ans. attached

Ques. 3. State number and date of permit, and date of priority you propose to establish under the permit.

Ans. attached

Ques. 4. State source of water supply and give exact location of point of diversion.

Ans. attached

Ques. 5. Describe your works of diversion, and state amount of water they are capable of conveying from point of diversion to place of use, and give name of canal or ditch or other works by which water is conducted to such place of use.

Ans. attachedQues. 6. State for what purpose water is used and describe place of use. (If for irrigation, name each subdivision in which used, and number of acres in each subdivision that have **actually** been irrigated with said water.) State whether cultivated or natural meadow land and the nature of all improvements which have been made as a direct result of said use.Ans. attached

Ques. 7. If for other than irrigation purposes, state how applied, amount of horse power generated, etc.

Ans. _____

Ques. 8. What is the minimum amount of water required for the use specified above?

Ans. attached

Ques. 9. If you are not the person or representative of the corporation to whom above mentioned permit was originally issued, please state how ownership was acquired by present holder.

Ans. attached

14679

Ques. 10. State when, how, in what amount and to what extent the water diverted under above mentioned permit has been used.

Ans. attached

Ques. 11. State when, how, in what amount and to what extent waters other than those diverted under the above mentioned permit have been diverted and applied to beneficial use upon the lands herein described. Give full particulars regarding such other appropriations and rights claimed thereunder.

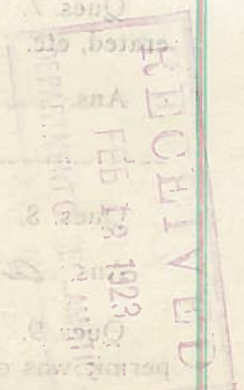

Ans. attached

Ans. to Que. 1

A.H.Froehlich. Age 58 years. Farmer and stock man. Residence and postoffice address, Picabo, Idaho.

Ans. to Que. 2

I am acting in my own behalf as a land holder and also in behalf of Drainage District No. 1, Blaine County, Idaho. I am a Commissioner of this Drainage District.

Ans. to Que. 3.

Permit No. 14679, dated and approved May 12, 1920, date of priority proposed to be established is February, 9th, 1920, but ~~this being~~ the right to the exclusive use of this water is also claimed.

Ans. to Que. 4.

This water has been developed by a system of deep drains in said Drainage District, and is ~~applied~~ turned into Silver Creek at a point which bears N. $76^{\circ}55'E$ 2175 ft., from the quarter corner between Sections 26 and 35 T. 1 S.R. 20 E.B.M. There are two points of diversion, one in the $NE\frac{1}{4}$ of $NW\frac{1}{4}$ of Section 30 in Twp. 1 S.R. 20 E.B.M., and the other is in the $SW\frac{1}{4}$ of $SE\frac{1}{4}$ of Section 20 in Twp. 1 S.R. 20 E.B.M., in Blaine County, Idaho. Diversion dams and ditches convey the water from these points of diversion to the place of use on the lands.

Ans. to Que. 5

The works of diversion are dams and open ditches, one is known as the Kilpatrick Canal, which will convey about 40 second feet. The other ditch is known as Ellison ditch, and will convey about 10 second feet.

Ans. to Que. 6

This water is used for irrigating the lands described on the blue print which is attached to this sheet. Some land is in cultivation, and some is meadow or pasture land. Land has been improved by plowing up and raising crops, and more of it has been reclaimed so that it can now be cultivated, and good crops raised.

Ans. to Que. 8

At least one inch to the acre is required for the irrigation of these lands.

Ans. to Que. 9

I, personally, and on behalf of Drainage District No. 1 Blaine County, am a holder of the above mentioned permit at this time.

Ans. to Que. 10

During the months in the summer of 1922, mostly in July and August, through the diversion ditches mentioned, at least 325 inches of water which had been developed by the drain ditches above mentioned, was diverted under this permit and applied to use on the lands described in said blue print. 200 inches of this 325 inches of water, is the amount that has been actually developed from under ground sources not tributary to any known stream, and 125 inches being reclaimed waste surface water not tributary to any known stream.

14679

Ans. to Que.11

On July 7th, 1917, the State Engineer of the State of Idaho, made an order authorizing the distribution of various decreed water rights over the lands described in the blue print attached hereto, on the basis of one inch to the acre for said lands. It has, however, developed that about all of these rights mentioned in this order which bear priority dates later than 1885 are uncertain and cannot be depended upon to furnish one inch per acre for irrigation on account of the fact that they are often cut off by the water master, and this leaves these lands without sufficient water to mature the crops, and ~~in~~ under this permit the holders of said lands desire to acquire an additional or supplemental water right for the purpose of supplying any shortage in said decreed water occasioned by the same being shut off by the water master. The holders of this permit having developed this water for this purpose claim a prior and exclusive right to the use of the same for such purpose.

Proof of Application of Water to Beneficial Use

Deposition of Witness

The deposition of two witnesses, on this form, taken separately, required in each case.

Ques. 1. State your name, age, residence, occupation and postoffice address.

Ans. Answer attached

Ques. 2. Are you acquainted with _____, the

holder of Permit No. 14679? How long have you known him and where does he reside?

Ans. attached

Ques. 3. Have you read or heard read said Permit No. 14679, and are you familiar with its provisions and conditions?

Ans. attached

Ques. 4. State source of water supply, place of diversion, and describe works for conveying water from point of diversion to place of use.

Ans. attached

Ques. 5. How many second feet of water do you estimate said works will safely conduct to place of use, and how much water have you seen being so conveyed?

Ans. attached

Ques. 6. State for what purpose water is used and at what place. (If for irrigation, give each subdivision in which water has been used and number of acres irrigated in each subdivision.) State whether cultivated or natural meadow land and the nature of all improvements which have been made as a direct result of said use.

Ans. attached

DEPARTMENT OF RECLAMATION

Ans. to Que. 1

My name is S.H. Chapman, 40 years of age, residence Shoshone, Idaho, Water Master of Districts 7 and 11, Big and Little Wood Rivers. Postoffice address is Shoshone, Idaho.

Ans. to Que. 2

I am acquainted with the holders of this permit, and have been since about 1918. They all reside at Picabo, Blaine County, Idaho.

Ans. to Que. 3

Yes.

Ans. to Que. 4

Water has been developed by a system of deep open drains in Drainage District No. 1, Blaine County, Idaho, and is delivered into Silver Creek at the point indicated in the application for this permit, and the two points of diversion from Silver Creek are located one in NE $\frac{1}{4}$ NW $\frac{1}{4}$ of Sec. 30, and the other in SW $\frac{1}{4}$ SE $\frac{1}{4}$ of Sec. 20, in 1wp. 1 S.R. 20 E.B.M., at the points stated in the application for this permit.

Diversion dams and open ditches convey the water from these points of diversion to the place of use.

Ans. to Que. 5

My records show that one of these diversion ditches will carry 40 second feet, and the other will carry 10 second feet, safely from the points of diversion to the place of use. My records show 40 sec. ft. has been measured in one ditch, and 9 sec. ft in the other, however, I estimate that this second ditch will safely carry 10 second feet.

Ans. to Que. 6

This water is being used for the irrigation of the lands described on the blue print on page 2 of the application for this permit. Some is cultivated, some meadow land, and some pasture. Improvements. A greater acreage has been plowed and put in cultivation, and still more can be reclaimed and made fit to produce crops.

Ans. to Que. 7.

Mostly a sandy-clay-loam. One inch per acre is required for proper irrigation and cultivation.

Ans. to Que. 8.

Mostly a sandy-clay-loam. One inch per acre is required for proper irrigation and cultivation.

Ans. to Que. 9

None whatever.

Ans. to Que. 10

My records show that this water was applied to use on the lands described in the above mentioned blue print during the year 1922. The amount of water actually developed under this permit and not heretofore tributary to any known stream, as shown from records kept during the seasons of 1921 and 1922 is at least an average of 200 inches. This amount may be modified by years of less or greater water supply. In addition to this 200 inches, an average of 125 inches of surface waste water ran into these drain ditches during the above years, but as to what amount of this waste water formerly ran into Silver Creek I have no record to show, but am convinced that a portion of this did find its way into Silver Creek.

Ans. to Que. 2. I am acquainted with the holders of this permit, and have been acquainted with them since the year 1818. They reside at Picabo, Idaho.

Ans. to Que. 3. ☒ Yes.

Ans. to Que. 4. This water has been developed by a system of deep drains in Drainage District No. 1, Blaine County, and turned into Silver Creek, in said county, at a point which bears N. $76^{\circ}55'E$ 2175 ft., from the quarter corner between Sections 26 and 35 in Twp. 1 S.R. 20 E.B.M. The places of diversion are: A- S. $38^{\circ}05'W$. 1320 ft from the quarter corner between Sections 19 and 30 in Twp. 1 S.R. 20 E.B.M., and, is in the NE $\frac{1}{4}$ of NW $\frac{1}{4}$ of Section 30 in Twp. 1 S.R. 20 E.B.M. And, B- N. $45^{\circ}00'E$. 1056 ft. distant from the quarter corner between sections 20 and 29 in Twp. 1 S.R. 20 E.B.M., and is in the SW $\frac{1}{4}$ of SE $\frac{1}{4}$ of Section 20 in Twp. 1 S.R. 20 E.B.M., in Blaine County, Idaho. Diversion dam and open ditch convey the water from point of diversion to place of use.

Ans. to Que. 5. About 40 second feet in one diversion ditch, and about 10 second feet in the other. I have seen this amount of water being conveyed in these ditches.

Ans. to Que. 6. The water is being used for irrigation of the lands described on the blue print hereto attached. Some natural meadow land, some in cultivation, and some pasture land. More land has been plowed up and put in cultivation, and a good deal of this land has been reclaimed and made fit for cultivation.

Ans. to Que. 8. Mostly a sandy-clay-loam, which will require one inch ~~perxixixixix~~ per acre for profitable cultivation.

Ans. to Que. 9

No.

Ans. to Que. 10. At various times during the summer of 1922, especially during the months of July and August, I personally applied a large portion of the water in question to beneficial use on the lands described on the blue print hereto attached; and also saw this water being applied on the remainder of said lands described on said blue print; all of which was diverted under said permit.

14679

Re: Permit No. 14679
Permit Holders, Drainage
District No. 1, Blaine County

} P r o t e s t by the
} BIG WOOD RIVER CANAL COMPANY,
} Protestants.

W. G. Swendsen,
Commissioner of Reclamation,
Boise, Idaho.

Comes now the Big Wood River Canal Company and respectfully represents that it is the owner of water rights in Big and Little Wood rivers and their tributaries in Water Districts No. 7 A, 7 B and 11 AB, and protests against the issuance of a license under Permit No. 14679 issued to Drainage District No. 1, claiming 50 cubic feet per second of what is designated in the permit as "an unnamed stream which is not now but as herein explained will be a tributary of Silver Creek," the said proof of beneficial use to be made before Roy Van Winkle, a notary public at Hailey, County of Blaine, State of Idaho, at ten o'clock A. M. on the 10th day of February, 1923. The said proof of beneficial use of water to be offered under the said permit, and, according to the published notice of intention to make the said proof, to be made in an amount and to the extent of 10 cubic feet per second of the waters alleged to be appropriated under the said permit, all according to the information of protestant as obtained from the said published notice appearing in the Times-News-Miner of Hailey, Idaho.

That this protest is based upon the following allegations, and conditions: First, that under the laws of the State of Idaho a drainage district is not authorized or permitted to appropriate the public waters or other waters of the State of Idaho, and because of this condition, the said permit is invalid and of no force and effect. Second, that the alleged permit by its provisions, seeks to appropriate water which is claimed to have been developed by reason of the construction of drainage works and that under the proof as contemplated, permit holder expects to secure a license in the amount of 10 cubic feet per second, whereas your protestant herein is advised, convinced and firmly believes that not to exceed 3 cubic feet per second of water has been developed, if any at all, and that if any water has been developed as a result of such work, the same has heretofore and at all times found its way by underground seepages and otherwise into Silver Creek or Little Wood River and has for a number of years last passed been available to and used by the protestant company herein.

Wherefore, your protestant prays that no license issue under the said permit No. 14679.

BIG WOOD CANAL COMPANY

Re: Permit No. 14679

Mr. Roy VanWinkle,
Hailey, Idaho

Dear Sir:

This will acknowledge receipt of your letter of February 2nd regarding pending proof on the above mentioned permit.

The reasoning set forth in your letter as regards protests is correct. However, this office has previously held in similar cases that the person before whom the proof was being made was authorized to accept protests and transmit them to this office for a consideration. Of course, the officer before whom proof is made is not authorized to conduct a hearing or to do any other act except to act as an agent of the department of reclamation in making proof and transmitting all documents to the office.

Therefore, it would be proper for you to receive any protests which may be filed and transmit them to us along with the depositions.

Very truly yours,

W. G. SWENDEEN
Commissioner of Reclamation

By

Assistant

LAW OFFICES OF

SULLIVAN, SULLIVAN & VAN WINKLE

HAILEY, IDAHO

February 2, 1923.

Department of Reclamation,
W.G. Swendsen, Commissioner,
Boise, Idaho.

Dear Sir: RE: PROOF OF COMPLETION OF WORKS AND
APPLICATION OF WATER TO BENEFICIAL
USE UNDER PERMIT NO. 14679.

I am in receipt of the forms sent me by your office upon which the above proof is to be submitted February 10th., together with instructions.

As I understand it, Section 5577 Idaho Compiled Statutes, I am to "receive the written statements made by the person or persons submitting such proof" (that is submitting proof as to the completion of works and the application of the water to beneficial use), "and the affidavits of the witnesses". And, that if any parties should desire to protest they must do so under the provisions of Section 5583 I.C.S., which provides that "Any person desiring to protest against the statements made by the person or persons submitting proof on the beneficial application of water in the published notice of their intention to submit such proof, shall file a statement with the department of reclamation on or before the date set for such proof, stating clearly the reason for such protest, and stating the reason, if any, why a license should not be issued confirming the right claimed", etc.

These statutory provisions appear to be perfectly clear to me, viz, that at the hearing before me on February 10th., only proof in support of the completion of works and application of the water can be received- that is the only proof authorized to be made at that time; and, that if any party should desire to protest or submit adverse proof, this then would have to be made and filed with the department under the provisions of Section 5583, as separate and distinct from the proof to be taken before me on February 10th.

Please advise me if my position in this procedure is correct, as I desire to have specific instructions on this point from your department. The language of the published notice and also the statutes indicate that my idea is correct, but I desire to have a letter from your department advising me definitely.

Very truly yours,

14679

Roy Van Winkle

INSTRUCTIONS
PROOF OF COMPLETION OF WORKS
AND
PROOF OF BENEFICIAL USE OF WATER

BOISE, IDAHO, **January 31, 1923**

Drainage District No.1,
c/o Roy Van Winkle,
Hailey, Idaho.

DEAR SIR:

I enclose herewith the following forms to be used in connection with proof of completion of works and beneficial use of water under Permit No. 14679

DEPOSITION OF PERMIT HOLDER;

DEPOSITIONS OF TWO WITNESSES.

In submitting this proof the following instructions should be CAREFULLY followed out, since failure to do so may result in the loss of rights:

1. On February 10, 1923, the date set for proof, the enclosed forms (two for permit holder and two each for two disinterested witnesses) should be filled out and sworn to, at Hailey before Roy Van Winkle, notary public.

2. When the depositions have been taken they should be mailed to this office, together with affidavit of publication of notice.

When these have been received, together with report of the examining engineer, if everything is properly executed, you will be further advised as to fees due, etc., before certificate is issued.

Yours truly,

W. G. SWENDSEN,
Commissioner of Reclamation,
~~State Engineer~~

Re: Blanks.

Sullivan, Sullivan & Van Winkle,
Attorneys at Law,
Hailey, Idaho.

Gentlemen:

Replying to your letter of the 26th inst., would say that for proof of completion of works under a permit where the amount of water claimed does not exceed 6.4 second feet, all that is required is the affidavit of holder, blank for which is herewith inclosed. This proof should be accompanied by fee of \$5.00.

If the amount of water claimed exceeds 6.4 second feet, notice of publication is required to be published four full weeks and proof made before some notary public or other officer authorized to administer oaths in this state. Deposition blanks will be furnished later. I am accordingly inclosing blank notices for this publication, in case the amount of water exceeds 6.4 second feet.

Very truly yours,

W. G. SWENDSEN,
Commissioner of Reclamation

KNOW ALL MEN BY THESE PRESENTS, That We, Drainage District No. 1 of the County of Blaine, State of Idaho, Kilpatrick Brothers Company, a corporation, Henry Smith, H.C. Randall, C.L. Randall, C.O. Thompson, N.B. Buckler, W.R. Patterson, Irvin Land and Cattle Co., A. Erickson, A.W. Baldwin, A.H. Froehlich, J.J. Froehlich, Horace White, S.L. Martin, E.H. Sowers, J.L. Freeman Estate, and others, being named as applicants in that certain application for permit to appropriate the public waters of the State of Idaho, numbered 20671, as principals, and _____

Leo Mercier and J.C. Gibbs both of Picabo, Blaine Co. Idaho

as sureties, are held and firmly bound unto the State of Idaho in the following penal sums, to-wit: The said principals in the penal sum of One Thousand (\$1,000.00) Dollars, and the said sureties in the following penal sums, to-wit:

Leo Mercier in the penal sum of \$ 1000.00
J.C. Gibbs in the penal sum of \$ 1000.00
_____ in the penal sum of \$ _____
_____ in the penal sum of \$ _____

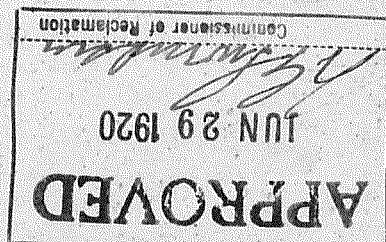

for the payment of which, well and truly to be made, we bind ourselves, our heirs, executors, and administrators jointly and severally, firmly by these presents, sealed with our seals and dated this 14th day of June, 1920.

The condition of the above obligation is such that whereas the above bound principals were, on the 12th. day of May, 1920, granted a permit under their said application numbered 20671, which permit is numbered 14679 and is recorded in Book 52, page 14697:

NOW, THEREFORE, The condition of this obligation is such that if the said applicants above named shall well and faithfully carry to completion the works of diversion as specified in said permit and in the application therefor, then this obligation is to be void and of no effect; otherwise to remain in full force and virtue.

Commissioner of Reclamation,

Boise, Idaho

Dear Sir:

Complying with your request we are enclosing herein a surety
bond executed by Drainage District ^{#1} of Blaine County, Idaho in
the amount of \$1000.00 to be filed with you in connection
with your permit number 14697 and which is recorded on page
14697 in book 52.

Please acknowledge receipt of this bond and if found not to
be properly executed or irregular in any way, please advise
us at once that we may have time to have the correction made
and returned to you before July 11th 1920. This being the
date this bond is required.

Yours very truly

Secretary Drainage Dist, No. One
Blaine County Idaho.
