IDWR / NORTH

1. Inform residents that lawn watering should be done in the morning or evening when evaporation is minimized.
2. Lawn watering should be no more than 15 minutes per area.
3. Automatic watering systems should be set for 15 minutes per zone.
4. Automatic systems do not water roads and driveways.
5. Inform residents that installing low flow shower heads will save water.
6. Turn off water when brushing teeth.
7. Replace older toilets and faucets (Pre 1992) with water-sense labeled toilets and faucets.
8. Periodically check for water leaks and repair promptly.
9. Green scape property where possible.
10. Sweep driveways rather than washing them down with water.
11. Wash a full load of laundry rather than small loads.
12. Insulate hot water pipes.
13. Check backflow devices regularly.
14. Use mulch around shrubs and garden plants to reduce evaporation from the soil surface and to cut down on weed growth.
