**To:** sclawson@larsenfarms.com; frank.wilson@sol.doi.gov; gary\_ball@fws.gov  
**Subject:** RE: BLF Land Transfers - Aerial Photos and Satellite Images

Mr. Clawson asked me to verify the dates for the photos and images. I found some of the information.

7/12/2004  
7/12/2005  
2006 - unknown  
7/2/2007  
7/20/2008  
6/28/2009  
2010 - unknown  
8/6/2011  
8/24/2012  
7/2/2013 (satellite)  
8/16/2013 (photo)

Please feel free to contact me with any other questions.

**Subject:** BLF Land Transfers - Aerial Photos and Satellite Images

Dear Parties,

Attached is a set of photos and images for the existing water rights identified in the BLF Land transfers. I have also included a copy of the measurement information associated with the existing ground water wells. Water rights 31-7047A and 31-2444 (which are listed in Transfer 79059) list two common points of diversion and therefore have two measurement records.

The water rights in question became subject to forfeiture beginning in 2002, the date the partial decrees were issued by the SRBA Court. For water right 31-7242, the full circle appears to be irrigated in 2004. However, the outer extent of the circle (which is the subject of Transfer 79058) does not appear to be irrigated again until 2013. Even in 2013, the apparent irrigation did not cover the full extent of the water right.

For water rights 31-2224 and 31-7047A, there are some areas that appear to be periodically irrigated. For example, the southeast part of the western pivot may have been irrigated in 2004, 2006 and 2009. However, other areas under these water rights show no visible signs of irrigation.

We can discuss this information in greater detail at our status conference on July 28<sup>th</sup>. Please feel free to forward this email to the other participants on the call.
