Great. Thanks Allen. No questions for now. I'll work with Cindy on the details in the coming weeks so the application is ready to be data entered into the new system by the middle of December.

John,

I discussed the fee issue for adding rights to the Lambert transfer with the state office. The decision is that any additional CFS rate added to the application would be paid at the incremental rate under the new fee schedule for transfers.

For example..... The current total CFS of the transfer is 54 CFS which has been paid (under the old fee schedule). If an additional 3 CFS were added to the transfer for a total of 57 CFS the incremental increase under the new fee schedule would be (3 cfs X \$40/cfs) = \$120. This fee assessment is the smallest of various options considered.

If there are ownership changes being made thru the transfer for any new right(s) added to the application there will be an additional fee of \$25/right. If the ownership change involves a split of right(s) the fee is \$100/right for any new right(s) added to the transfer. If the transfer involves a split of right(s) but no ownership change is involved there is no additional fee.

Our office is looking forward to working with you to complete this process. As you know Cindy is taking the lead.

If you have questions let me know.
