Subject: Re: Draft Transfer T78302 approval for Lambert/Drakos

Allen, I made it through your draft. I found only one issue. It's on right 45-13974. It looks like the Willow Creek source and POD are missing. Can you take a look at that?

As I worked through the combined use limits, I convinced myself that some were redundant and could be eliminated, but then decided they are accurate so it's not worth trying to sort out which ones, if any, could be deleted. I'll leave it to you and Pam to decide whether there is redundancy that could and should be eliminated.

Thanks,

John

John and Pam,

Attached is my draft. It has taken a lot of work to get it to this point. I would appreciate you taking a critical look before I issue the preliminary approval.

Hopefully I can wrap this up by next week. If you have any questions please let me know.

Thanks,

Allen
