RE: Water Permit Number 77-14223

Hello Mrs. Block,

Please find my attached Statement of Completion, and a check for \$50. I did not see a place on the Statement of Completion for my below information, so maybe it is not necessary but I thought I would sent it to you in the event you might want it for your files.

I installed a Honda water pump along the bank of the South Fork of the Salmon River at a location my Garmin GPS said was: elevation 2,243 feet -N 45.36368 - W 115.51611 degrees. I ran a $\frac{3}{4}$ inch supply line, approximately 360 feet, to my lot #4 in Copenhaver Subdivision, to an elevation of 2,280 feet at a GPS location of N 45.36473 - W115.51568. My water supply line is connected to a faucet with a gate valve and hose bib that provides beneficial use water to my parcel. The water flow is not more than .04 CFS or 18 Gallons per minute. I did this work on October 28th - 30th, 2014. Please call if you have any questions.

Sincerely,

Steve Wright
