SOUTHERN REGIONMINIMUM REQUIREMENTS CHECKLIST
TO BE SUBMITTED WITH APPLICATION FOR TRANSFER

An application for transfer must be prepared in accordance with the minimum requirements listed below to be acceptable for processing by the Department. Incomplete applications will be returned. The instructions, fee schedule, Part 2A reports and additional Part 2B forms are available from any Department office or on the Department's website at www.idwr.idaho.gov.

Name of Applicant(s) Bruce L & Kathy J BulcherCheck whether each item below is *attached* (Yes) or *not applicable* (N/A) for the proposed transfer.Yes N/A * Means the item is always required and must be included with the application.

- ☒ * Completed Application for Transfer of Water Right form, Part 1.
- ☒ * Signature of applicant(s) or applicant's authorized representative on Application for Transfer Part 1. Include evidence of authority labeled Attachment #3 (see below) if signed by representative.
- ☒ * Application for Transfer Part 2A. Attach a Part 2A report describing each water right in the transfer as currently recorded.
- ☒ ☐ Complete and attach an Application for Transfer Part 2B for each water right for which only a portion is proposed to be changed through this transfer application.
- ☒ * Application for Transfer Part 3A is always required (see Attachment #7a below); Parts 3B and 3C must be completed for transfer applications proposing to change the nature of use of the water right(s) or proposing changes to supplemental right(s).
- ☒ * Correct fee submitted with transfer application form. (Fee schedule is on website and instructions for application for transfer.)

Attachments to Application - Label each attachment with the corresponding number shown below as Attachment #1-9.

- ☐ ☒ #1 If the applicant is a business, partnership, organization, or association, and not currently registered in the State of Idaho as a business entity, attach documentation identifying officers authorized to sign or act on behalf of right holder. (See Part 1.)
- ☒ ☐ #2a Water Right ownership documentation if Dept. records do not show the applicant as the current water right owner. **
- ☐ ☒ #2b If the ownership of the water right will change as a result of the proposed transfer to a new place of use, attach documentation showing land and water right ownership at the new place of use. Include documentation for all affected land and owner(s).**
** Additional fee(s) required for water right ownership changes; see fee schedule.
- ☐ ☒ #3 Documentation of authority to make the change if the applicant is not the water right owner.
- ☐ ☒ #4 Power of Attorney or documentation providing authority to sign or act on the applicant's behalf. (See Part 1.)
- ☐ ☒ #5 If the transfer application proposes to change the point of diversion for a water right affecting the Eastern Snake Plain Aquifer (ESPA), attach the results of an ESPA analysis and a detailed mitigation plan to offset any depletions to hydraulically connected reaches of the Snake River. ESPA transfer spreadsheet and model grid labeled cells are available on the Department's website at www.idwr.idaho.gov/WaterManagement/WaterRights/WaterRightTransfers/resources.htm.
- ☒ ☐ #6 Notarized statement of agreement or a statement on official letterhead signed by an authorized representative from each lien holder or other entity with financial interest in the water right(s) or land affected by the proposed transfer. (See Part 1.5.c.)
- ☒ * #7a Attach a map identifying the proposed point(s) of diversion, place(s) of use, and water diversion and distribution system details as described on the application. Include legal description labels. If only a portion of the right is proposed to be changed, identify the current location of the part of the existing right(s) proposed to be changed. (See Part 3A.)
- ☒ ☐ #7b If the transfer application proposes to change the place or purpose of use of an irrigation right attach a Geographic Information System (GIS) shape file, or an aerial photo or other image clearly delineating the location and extent of existing acres and changes to the place of use.
- ☐ ☒ #8a If the transfer application proposes to change the nature of use or period of use for one or more rights, provide documentation describing the extent of historic beneficial use for the water rights proposed to be transferred and document how enlargement will be avoided. (See Part 3B.) Additional fee required for proposed changes to nature of use; see fee schedule.
- ☐ ☒ #8b If the transfer application proposes to change the place of use of a supplemental irrigation right, provide documentation regarding the historic use of the supplemental right(s) and availability or reliability of the primary right(s) being supplemented, both before and after the proposed change. (See Part 3C.)
- ☐ ☒ #9 Other. Please describe: _____

5. General Information:

- a. Describe the complete diversion system, including how you will accommodate a measuring device and lockable controlling works should they be required now or in the future:
Well, pump & pipe system feed pivots & risers.

- b. Who owns the property at the point(s) of diversion? Applicant
If other than the applicant, describe the arrangement enabling the applicant to access the property for the diversion system:

- c. Are the lands from which you propose to transfer the water right subject to any liens, deeds of trust, mortgages, or contracts?
If yes, ☒ Attach a notarized statement from the holder of the lien, deed of trust, mortgage or contract agreeing to the proposed changes on official letterhead signed by an authorized representative. Label it **Attachment #6. List the name of the entity and type of lien:** Northwest Farm Credit

It is the applicant's responsibility to provide notice to lien holder, trustee, mortgagor, or contract holder of the proposed changes that may impact or change the value of the water rights or affected real property. Any misrepresentation of legal encumbrance on this application may result in rejection of the application or cancellation of an approval.

- d. Describe the effect on the land now irrigated if the place or purpose of use is changed pursuant to this transfer:
No change

- e. Describe the use of any other water right(s) for the same purpose or land, or the same diversion system as right(s) proposed to be transferred at both the existing and proposed point(s) of diversion and place(s) use:
Canal shares used on 280 acres within the PPU area. Groundwater right is not stacked with the TFCC water, and is primary water source.

- f. To your knowledge, has/is any portion of the water right(s) proposed to be changed:

APPLICATION FOR TRANSFER OF WATER RIGHT PART 3

A. PLAT MAP (See Part 3A of Instructions for application for transfer for complete requirements.)

- ☒ Attach a map of the diversion, measurement, control, and distribution system. Label it **Attachment #7a**.
- ☒ If the transfer application proposes to change the place or purpose of use of an irrigation right attach a Geographic Information System (GIS) shape file, or an aerial photo or other image clearly delineating the location and extent of existing acres and changes to the place of use. Label it **Attachment #7b**. If the place of use currently consists of a permissible place of use, then the attachment is not required if the application contains a clear statement that the boundaries for the place of use are not proposed to be changed by the transfer and the total number of irrigated acres within the place of use before and after the transfer is clearly stated.

B. CHANGES IN NATURE OF USE (Water Balance)

- ☐ If you propose to change the nature of use or period of use of all or part of the rights(s) listed in this application, attach documentation describing the extent of historic beneficial use of the portion of the right(s) proposed to be changed. Also attach documentation showing that the portion of the right(s) to be changed will not be enlarged in rate, volume, or consumptive use through the proposed change. Label it **Attachment #8a**.

C. PLACE OF USE CHANGES TO SUPPLEMENTAL IRRIGATION RIGHTS

- ☐ If you propose to change the place of use of a supplemental irrigation right, answer below and attach supporting documentation. Label it **Attachment #8b**.

Describe how the supplemental water rights have been used historically in conjunction with other water rights at the existing place of use. Describe the time during the irrigation season that the supplemental rights have been used. Include information about the availability or reliability of the primary right(s) being supplemented, both before and after the change. If the applicant is proposing to change a supplemental irrigation right to a primary right, provide the information required on Part 3B above:

These groundwater rights are not supplemental. Original licensing documents, SRBA documents, and Power records provided from 2009 through 2013 show water use that is not supplemental. Condition S20 was placed on these water rights following the SRBA partial decree because rights were located within the service area of the Twin Falls Canal Company. No analysis was performed to illustrate that the rights were stacked with TFCC water.

Harold and Bruce Bulcher

SUBJECT: New Claim

Harold was in last week and wanted to amend A47-02521, changing the P/U from the original license, as he claimed, to show how the system was actually used. He and his nephew, Bruce, came back in today and explained their system. They own 360 acres and have 280 canal shares (appurtenant to the NE quarter, the north half of the SE quarter, and the SESE quarter.) They bought the property in April of 1987 and put in the current system, which co-mingles the water in ponds and ditches. The wells in the NE quarter have been abandoned and they only use the well in the SWNESE. They stated the well pumps approximately 50". They decided to leave A47-02521 as claimed and file on the unclaimed well for A47-02531, but claiming the P/U in the SESW and the SWSE (instead of the NESE and NWSE as originally licensed). It would appear to be an Accomplished Transfer based on the dates as stated. It also appears the sytem is a PPU.

I gave Bruce an O/C form for A47-02521 as he bought his father's (Louis) interest.

[Licenses 47-02504 and 47-02506 were originally appurtenant to these 80 acres (SESW, SWSE) but are no longer.]

MEMORANDUM

Date: January 7, 2015
To: Transfer 79578 File
From: Bill Mills
Re: Evaluation of Sufficiency of Information Submitted

Application for transfer proposes creating a 360 acre permissible place of use (PPU) for irrigation ground water right 47-2531, a 0.700 cfs and 320.0 af right that will be used to irrigate 80.0 acres located in the SESW1/4 and SWSE1/4 of Section 18, Township 11S, Range 19E, B.M. of a 360 acre PPU. There will be no change to the point of diversion. PPU and POD are located 5.4 to 6.2 miles east and 1.2 to 2.2 miles south of Murtaugh.

This right was claimed in the SRBA, and due to evidence that canal water was used on the licensed POU, a supplemental condition was placed on the recommendation and subsequent decreed right. Since 1995, the applicant has maintained that this right was not used in conjunction with canal shares. The applicant had filed a claim for this water right on 04/14/1995 as an accomplished transfer claiming the POU in the SESW and SWSE of Sec. 18, Twp 11S, Rge 19E and not as originally licensed in the NESE and NWSE. The claim was recommended and decreed as it had been licensed in the NESE and NWSE and did not recognize the accomplished transfer. Provided documentation from the Twin Falls Canal Co. indicates there are canal shares on the licensed POU in the NESE and NWSE, but there aren't any used in the SESW and SWSE where the claimant indicates the ground water has been used since spring of 1990. An affidavit was provided by the applicant that explains the timeline and how the ground water use for this right was resumed in 1990 at the claimed POU. After reviewing this proposed transfer with administrative staff, it was decided that the affidavit, a communication documentation (dated 4/14/1995) from the claim file, documentation provided by Twin Falls Canal Company and power records provided by the applicant appear to provide sufficient evidence to support the applicants claim of the intent to not use canal shares and ground water together.

A provided "206" map places the water right on the claimed 80 acres where there are no canal shares, but also seeks to create a 360 acre PPU that also includes 280 acres where canal shares are used. Since the applicant desires to maintain this right as primary while utilizing canal shares on acres in the same PPU, I have added two conditions to the right to indicate the right is currently considered primary but could become supplemental should the applicant use the ground water in conjunction with canal shares on other acres within the PPU.

Overlap review indicates there are no other irrigation water rights appurtenant to the PPU, except for 47-2521, a 2.0 cfs ground water right that is being sold and moved to new ground in companion transfer #79579. As previously discussed, the PPU is within Twin Falls Canal Co. service area and canal shares are currently used in the NE1/4 (159.97 shares), NWSE1/4 (40 shares), NESE1/4 (40 shares) and the

SESE1/4 (40 shares) of Section 18, Township 11S, Range 19E, B.M. POD and PPU are located within Artesian City Critical Ground Water Management Area.

Since the application only proposes changing the place of use and there is no anticipated hydrologic change, the transfer can be processed and approved without advertising.

- **Authority to File:** Applicant is listed as the current owner of the water right being transferred.
- **Water Right Validity:** Water right 47-2531 was decreed in the SRBA on 6/1/2010. Recent aerial and satellite imagery indicate the properties associated with these rights appear to be irrigated.
- **Injury to Other Water Rights:**
None anticipated.
- **Enlargement of Use:**
None anticipated.
- **Local Public Interest:**
No issues anticipated.
- **Beneficial Use/Conservation of Water Resources:**
Proposed use is recognized as a beneficial use of water.
- **Effect on the Economy of the Local Area:**
None Anticipated.
- **Effect on Agricultural Base of the Local Economy:**
None Anticipated.

Review of the application finds there is no clear inconsistency with criteria set forth in Section 42-222 Idaho Code preventing processing

Hi Bill,

Bruce confirmed that the only well that will be used for water right no. 47-2531 is located in the SWNESE of Section 18 T11S R19E. The other two PODs listed should be removed from the transfer application.

BEFORE THE IDAHO DEPARTMENT OF WATER RESOURCES

DEPT OF WATER RESOURCES
SOUTHERN REGIONIN THE MATTER OF THE WATER RIGHT
NOS. 47-2521 AND 47-2531) COMMENTS AND
) EVIDENCE OF
) BRUCE BULCHER

COMES NOW, Bruce Bulcher, and provides the following comments and evidence in this matter:

1. I have lived in the Kimberly, Idaho area for most of my life. I was born Twin Falls on 5/23/1944. With the exception of a few years in college, military service, and working in Boise, I have lived in the immediate area.
2. I have a complete working knowledge of the water delivery system and the associate water problems on the farm because I grew up working the system and have been around the facilities since 1944 through the present. I became a managing member of our family farm in the mid-1980s when my Uncle decided to retire.
3. My father, Louis Bulcher, and uncle, Harold Bulcher, originally purchased 160 acres with groundwater right 47-2521 in December 1951. This land was owned by a Mr. Fortner, who originally applied for and developed the water right. There were two wells that served this property, and the groundwater right was the only water source.
4. My family purchased the 80-acres appurtenant to water right 47-2531 from the Stanger Family in 1959. The groundwater right was the only water source that irrigated this ground. In 1959, we had a total of 240-acres with the the Fortner 160-acres combined with the Stanger 80-acres.
5. Water right nos. 47-2521 and 47-2531 were permitted and licensed in the 1940s and 1950s. Both rights were licensed as primary groundwater rights. TFCC was not used in combination with these rights. This is clearly outlined in the water right licenses for both rights.
6. In the 1980s, the main well for the Fortner 160-acres would surge and begin to pump air. To preserved the well equipment, it forced us to shut the well off for periods of time. The groundwater also was high in alkalinity and would cause stress and damage to the plants, especially the beans.
7. My father and uncle decided to acquire Twin Falls Canal Company shares to replace the groundwater and eliminate the water problems associated with the well. We first acquired shares of the canal company in 1986. We continued to acquire shares of TFCC when they were available in an effort to obtain sufficient shares to convert from groundwater to TFCC.
8. To convert the irrigation system from groundwater to canal water required a substantial capital investment, so we did not convert our irrigation system until we had sufficient TFCC shares to completely convert the 240-acres. In 1987, we had acquired 240-share of TFCC, and we converted our irrigation system from groundwater to surface water. We completely disconnected the wells from the irrigation system and delivered only TFCC water. The TFCC water then irrigated 240-acres that used to be irrigated by groundwater rights 47-2521 and 47-2531.

9. The Savage family had 120-acres of ground next to our farm that they wanted to sell. This ground was historically irrigated by TFCC, but the Savages wanted to sell it without water. We purchased 40-acres from the Savages in 1987 and the other 80-acres in 1988. That gave us a total of 360-acres of ground. Initially we did not irrigate the Savage ground when we purchased it.
10. We acquired another 40-shares of TFCC water in 1990, which gave us 280-shares. We began to irrigate 280-acres with TFCC. We also began to resume use of water right 47-2531 on the remaining 80-acres without water, which would allow us a full irrigation supply on 360-acres.
11. In 1995, I went to the Department of Water Resources to try to explain our efforts to convert from groundwater to surface water and to make the appropriate claims in the SRBA, considering several things had changed since my father first made the claim in 1988. We spoke to Jeanie Robertson about the TFCC and the groundwater rights. We explained to Ms. Robertson how and when the surface water was acquired and not used until it replaced the groundwater rights. And how we recently began to use water right 47-2531 to irrigate the 80-acres of the Savage property that we did not have TFCC share for. Ms. Robertson adjusted the claim on both water rights to reflect our conversation. We assumed that IDWR would make the appropriate changes to the claim, as we discussed.
12. The SRBA partial decree was issued in 2010. The partial decree did not include language that the groundwater rights were now stacked with the TFCC water. We assumed that the partial decree would reflect the water rights moving forward.
13. After the partial decree was issued, IDWR placed a condition on both of our groundwater rights that the groundwater rights were supplemental to the TFCC shares. This was done without our consent or knowledge.
14. We have never used the water rights 47-2521 and 47-2531 in combination with TFCC water. The farm has been irrigated with surface water on 280-acres and ground water on 80-acres since 1990.
15. Since we have not used the groundwater right 47-2521, we decided that we would sell the right to someone how could use the groundwater. Once we decided to sell the right, it came to our attention that IDWR placed a combination statement on this right that it can now only be used in combination with TFCC water. This is contrary to the water right license, contrary to our explanation to Ms. Robertson in 1995, and contrary to how the system has been operating since we converted from groundwater to surface water.

Re: Transfer Applications for Bruce Bulcher
Project No. 1248-01-2013

Dear Allen,

Enclosed with this letter are three applications for transfer of water rights. I will discuss each water right transfer and how these applications are interrelated.

Bruce Bulcher came into our office last winter to inquire about options regarding his groundwater right (47-2521) that he no longer uses or needs. This groundwater was licensed for irrigation of 146.5 acres with 2 cfs and has a priority date of 10/25/1948. The Bulcher's also have another groundwater right (47-2531) with a priority date of 8/19/1950 to irrigate 80 acres with 0.7 cfs. Combined, these rights authorized irrigation of 226.5 acres. These rights were originally licensed as primary water source and not combined with any other source.

The Bulcher family decided that pumping groundwater for irrigation was economically prohibitive and they secured 239.97 shares of Twin Falls Canal Company in 1985 and 1986 to replace the irrigation water source on the farm. The groundwater rights were used to irrigate the rest of the 360-acre farm, not as supplement water to the TFCC shares.

Both groundwater rights were partially decreed in the SRBA on 6/10/2010. The IDWR recommendation and SRBA partial decree followed the license and historical documents, which supported that these groundwater rights are primary water sources and are not supplementary to TFCC water. However, following the partial decree, IDWR added an explanatory comment that these rights were combined with TFCC water (Condition S20). It appears that this comment was incorrectly applied to these groundwater rights, as these groundwater rights were developed as primary rights and then replaced by TFCC water. According to Mr. Bulcher, these groundwater rights were never used in combination with TFCC.

Water Resources

Mr. Bulcher has provided power records from 2009 through 2013 to illustrate that these rights have not been used in combination with TFCC water. The average groundwater diversion volume was calculated at under 50 acre-feet per year. Therefore these groundwater rights were not used in combination with TFCC water and they should be treated as primary groundwater rights. We respectfully request that condition S20 be removed from water right 47-2521 and 47-2531 to reflect the original license, water right recommendation, and SRBA partial decree. Since that these rights were partially decreed on 6/10/2010, Mr. Bulcher has until 6/10/2015 before the State can consider these rights forfeited.

With the establishment that these groundwater rights are primary, Mr. Bulcher proposes the following transfers:

1. Transfer water right 47-2531 to create a PPU of the Bulcher property with the current irrigated POU within the PPU as the SESW and SWSE of Section 18 T11S R19E. This POU is 80-acres and this right will be limited to 80-acres within the PPU boundary. TFCC water will not be used on the same 80-acres of ground.
2. Transfer water right 47-2521 to the Funk Farms. The POU of the water right will be within a defined PPU boundary of 1451-acres, but this water right will be limited to 146.5-acres as identified.
 - a. Part of the new POU includes areas that have water rights owned by Shaunna and Danford Crane. Mr. and Mrs. Crane have also included a transfer to move 57.5-acres of groundwater rights from their current place of use to make room for the new Bulcher water rights.
