

MEMORANDUM

TO: File 95-11404

FROM: Daniel Nelson – Staff Hydrologist

DATE: February 9, 2015

SUBJECT: Review of Water Right 95-11404 for In-house Exam

This permit was originally targeted for an in-house filed exam. After further review, it appears as though the place of use may or may not overlap some or all of water rights 95-11537 and 95-7937. Due to the overlapping water rights, it is doubtful that we can do an in-house review for this permit. Therefore, this permit has been put back onto the shelves until proof of beneficial use is filed on water right 95-11537, so the two files can be field examined together.

Please place a copy of this memo in files 95-11404 and 95-11537.
