

CONVERSATION MEMORANDUM

TO: Water Right File # 96-9453

FROM: Darla Block

DATE: February 05, 2015

SUBJECT: Permit holder's domestic use from an unnamed stream.

This morning I received a phone call from Stephen Reichle (permit holder) regarding the Proof Due Notice he received from the Department. Mr. Reichle plans to file the Statement of Completion form.

During our conversation I quoted permit condition no. 3, which states that a fish screen of $\frac{1}{4}$ inch or smaller mesh shall be installed and maintained at the point of diversion. He asked how he was suppose to do that since all he does is carry the water by bucket from the stream to his house for doing dishes, bathing, etc. I let him know that all I could think of for him to do was to place a screen over the bucket as he fills it.
