35-8624

Hi Kerrie.

Just wanted to notify IDWR that the battery for the flow meter on our Johnson pump died in December. During our routine monitoring we noticed it and called PumpCo to get a new one installed. They had to order it in. They notified us on January 16, 2015 that they had installed the new battery and put a tamper-proof lock on the meter. So we are now back up and running.

Thanks.
