Evaluation of overall mitigation requirements per reach Steady State and Transient State, and Off-Setting Benefits (Sum of reach debits only where mitigation is required and credits)

Carry out one way analysis. If reach depletions go up, it is a debit, if they go down, it is a credit. Sum all debits only where mitigation is required (dark yellow) and all credits (light yellow). Mitigation is required for the full amount of the summed values if greater than zero

Steady state analysis represents permanent mitigation requirements at future steady state (or last timestep from the ESPAM Transfer Tool model run)

Transient state analysis represents mitigation requirements for the worst or maximum time step in the model run.

Evaluation of transient state mitigation requirement is not comprehensive across all time steps. Instead this evaluation finds the maximum stream depletion following the start of the transfer and looks at depletion amounts from that time step. In many instances this depletion is greater than the depletion associated with the steady state condition or final time step. This evaluation is merely an indicator of whether transient depletions must be considered, not an indicator of all transient impacts.

Evaluation of Permanent Mitigation Efforts (non-use, acreage consolidation) in Addition to Off-Setting Transfer Benefits - Steady State Evaluation Only

Three existing wells located on the Moss Greenhouses property will be used to provide up to 0.24 cfs and 37.0 afa of water for commercial use. The current and proposed points of diversion are located within the ESPA. A groundwater model analysis was performed and included with the transfer. This analysis modeled the change proposed by this transfer, # 79699, along with the changes proposed by transfers # 79700 and # 79775. According to the model analysis, by combining these three transfers the results in depletions to hydraulically connected reaches of the Snake River are small enough to not require mitigation. The transfer moves water rights within Water District 130 so water master comments will be solicited.

- **Authority to File:**

The application is filed in the name of Idaho Water Company. The application includes a copy of a purchase and sales agreement signed by Idaho Water Company and Myron and Ellen Huettig, the current owners of the rights involved with the transfer. The application also includes a copy of a purchase and sales agreement signed by Idaho Water Company and Kevin and Dana Moss, representatives of Moss Greenhouses. These agreements make the parties aware of the transfer and indicate that the eventual sale of the water rights is contingent on the completed transfer of the water rights.

- **Water Right Validity:**

The rights involved with the transfer were decreed in the SRBA in 2001 and examination of recent aerial photography indicates that the current place of use appears irrigated.

- **Injury to Other Water Rights:**

None anticipated.

- **Enlargement of Use:**

None anticipated.

- **Local Public Interest:**

No issues anticipated. The application will be subject to public notice and protest.

- **Beneficial Use/Conservation of Water Resources:**

Proposed use is recognized as a beneficial use of water.

- **Effect on Economy of the Local Area:**

None anticipated.

- **Effect of the Agricultural Base of the Local Area:**

None anticipated.

Review of the application finds there is no clear inconsistency with criteria set forth in Section 42-222 Idaho Code preventing processing of this application.

Re: Wickel Land Company LLC and Moss Greenhouse

Dear Mr. Skinner:

Wickel Land Company LLC has recently submitted two irrigation transfers and Moss Greenhouses has submitted a transfer for commercial water use. It is necessary to combine the ESPA Model analysis of these three water right transfers into one analysis to facilitate the proposed transfers.

The ESPA Model analysis is attached to this letter. The analysis only utilizes the consumptive portion of the water rights that are changing due to the transfer. The combined ESPA Model analysis indicates that no mitigation is required from these three transfers.

Please contact me if you have any questions.

Sincerely,

Greg Sullivan, M.S., Engineer

Re: Idaho Water Company and Huettig Water Right 36-16390

Dear Mr. Merritt:

Idaho Water Company is submitting two water right transfers. One transfer is to Moss Greenhouses and the second is to Ardel Wickel. Through the analysis of the transfers, IDWR identified some concerns regarding the place of use location for water right permit 36-16390.

Water right Permit 36-16390 is a waste water irrigation right. It is proposed to reduce the current place of use of 36-16390 to 781.0 acres by relinquishing a 40.0 acres in the T 10S R 20E Sec. 28 NWSW.

Due to the 3.0 cfs diversion rate of 36-16390, it is not possible to irrigate the entire place of use of 36-16390 with waste water. The topographical layout of the farm also makes it in-efficient to pump the waste water to this particular 40.0 acres of farm ground.

At this time, the Huettig's are submitting a relinquishment form and two affidavits identifying where the waste water has been utilized.

Sincerely,

Greg Sullivan, M.S., Engineer

Delbert Kohtz
Idaho Water Company

Dear Mr. Kohtz:

Our office recently began processing two water right transfer applications filed in the name of Idaho Water Company. These applications were submitted as a package, with each application involving portions of water rights 36-2117 and 36-2594 in the name of Myron and Ellen Huettig. The applications have been assigned transfer numbers 79699 and 79700 for reference purposes.

During initial review of the applications, it was discovered that the place of use of water rights 36-2117 and 36-2594 overlaps water right permit 36-16390. Application for Permit 36-16390 was originally filed by Myron &/or Steven Huettig in March of 2006 for the diversion of wastewater for irrigation use on lands including the place of use of water rights 36-2117 and 36-2594. The application was subject to the moratorium, but the application included a statement indicating "*Mitigation plan is that when wastewater is available to be pumped from the pond, the wells will not be used*". The application was processed (including advertising) and eventually approved based on the idea that use of the wastewater would be offset (mitigated) by the non use of the overlapping groundwater rights, including rights 36-2117 and 36-2594. The Huettigs were granted a new irrigation water right in a moratorium area based on the non use of groundwater and now appear to be attempting to transfer the groundwater away to new use(s).

Please note that the Department's Transfer Processing Policies & Procedures Memorandum (Transfer Processing Memo # 24) indicates the following...

Water rights are "stacked" when two or more water rights, generally of different priorities and often from different sources, are used for the same use and overlie the same place of use.

The memo also indicates...

An application for transfer proposing to "unstack" one or more water rights used for irrigation or other use, without changing all the rights for the same use, is presumed to enlarge the water right.

The two transfer applications (transfer numbers 79699 and 79700) involving portions of water rights 36-2117 and 36-2594 appear to result in an enlargement in use of water. **The Department will hold further processing of the applications for 30 days to allow submittal of additional information addressing the potential enlargement issue. After that time, if adequate information is not received, the Department will issue a preliminary order to reject the applications.** As an alternative, you can withdraw the applications and request a refund of the filing fee(s).

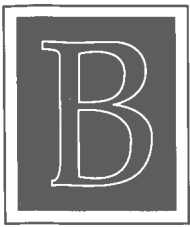

If you have any questions, or if I can be of any further assistance, feel free to contact me at your convenience.

Re: Idaho Water Company

Dear Mr. Merritt:

Idaho Water Company is submitting two water right transfers. The first transfer proposes changing 11.9 acres of water rights 36-2594 and 36-2117 from a beneficial use of irrigation to 37.0 acre feet of commercial water. The second transfer is proposing to transfer 13.0 acres of irrigation to 13.0 acres of irrigation. These two transfers are being facilitated by the purchase of 40.0 acres of 36-2594 and 36-2117, which is currently owned by Myron and Ellen Huettig.

The Huettig water rights 36-2594 and 36-2117 are two of several water rights owned by the Huettig's. However, the 160.0 acres currently authorized by 36-2594 and 36-2117 are additive to the other irrigation water rights on the farm. The point of diversion for 36-2594 and 36-2117 is located in ESPA Model cell 76 35.

These two transfers must be proceed together to offset any adverse impacts these transfers may have on the river reaches of the Snake River. The ESPA model analysis for these two transfers are being submitted to the Department with the transfer applications. No mitigation is required based on the ESPA Model analysis.

The ownership of the portions of water rights 36-2594 and 36-2117 that will be split off by these two transfers will be updated after the transfers are approved by the Idaho Department of Water Resources.

Idaho Water Company has entered into an agreement with Kevin and Dana Moss, the owners of Moss Greenhouses, Inc., for 37.0 afa of commercial water. The 11.9 acres of water rights 36-2594 and 36-2117 have been utilized to grow alfalfa. The consumptive water use on the 11.9 acres is 3.1 ft/season based on frequent cuttings of alfalfa near Hazelton, Idaho (University of Idaho).

This transfer to Moss Greenhouses would change the beneficial use to commercial, the period of use will be changed to year round use and the point of diversion will be changed to the two existing wells at the greenhouse facility. The two existing wells are located in ESPA model cell 58 26.

Idaho Water Company has entered into an agreement with Ardel Wickel for 13.0 acres of irrigation water. Ardel Wickel owns a farm near Declo, Idaho. Ardel Wickel rented water from the Water Supply Bank for the 2014 irrigation season. The 13.0 acres will be an additive component of the existing water rights authorized in the current permissible place of use. There will be a total of 659 acres of irrigation allowed.

The beneficial use of the 13.0 acres will not be changing, the period of use will not be changing but the point of diversion will be changing to the existing wells on the Wickel Farm. ESPA model cell 90 61 was used in the ESPA Model analysis for this transfer. The current permissible place of use for the Wickel Farm will be expanded with this transfer to cover two small wiper pivots covered by the proposed 13.0 acres.

Please contact me if you have any questions.
