RE: Point of Diversion for Water Right 77-10002

Dear Water Right Holder:

On January 7, 2015, the Idaho Department of Water Resources (Department) received a map from you marking the location of a spring you are associating with water right 77-10002. However, the source of this water right is from groundwater.

If you are using the spring for water on your property, you will need a different water right to do so. I have enclosed an Application for Permit for your benefit. Forms are also available at www.idwr.idaho.gov.

If you have any questions, please contact the State office at 208-287-4800 or the Western Region Office at 208-334-2190.

Sincerely,

Jean Hersley
Technical Records Specialist II
