change*

Thomas,

Your message has been received. Look for a postal letter (in the next couple weeks) giving confirmation that the change has been made in our system.

Thanks,

Subject: Re: WR 98-7942 Diversion Rate

Dear Ms. Newbry,

Thank you for your email of January 9, 2015, and letter of January 14, 2015, notifying us of the recorded Ownership Change of Water Right 98-7942 that allots us a diversion rate of .01cfs.

As we have discussed, our parcel is twice the size of our immediate neighbors that share from the original water right [98-4075] yet their diversion rate allotment of .02cfs is twice that of ours. Also, as we discussed, the newer Change of Ownership forms we filed did not allow us to specify a requested allotment of the standard .02cfs to water up to 10 head of stock.

Accordingly, we would like to respectfully request that a modification be made to our water right [98-7942] to increase our allotted diversion rate to the standard .02cfs to water up to approximately 10 head of our stock.

Please confirm to us that you have received our modification request.

Thank you very much for your assistance with this matter.

Sincerely,

Tom and Kathy Six

Hello Mr. Thomas Six,

I have met with my supervisor regarding our January 9, 2015 discussion about the diversion rate you received following the Ownership Change received by IDWR on December 1, 2014.

Currently, the Ownership Change form which you submitted states that "The water right or claims were divided proportionately based on the portion of their place(s) of use acquired by the new owner." This is how the water right 98-4075 has been split, with 0.01 cfs allotted to you.

You noted that your immediate neighbors each have a diversion rate of 0.02 cfs. This was allowed on the basis of their actual stock or an agreed upon amount from the previous owner.

If you would like to modify the diversion rate which has been allotted to you, please submit to me a statement in writing (email is okay). If it will be on the basis similar to that of your neighbors, please include a note that you want the standard 0.02 cfs to water up to approximately 10 head of stock.

Following your statement, I can make the modification and return you a postal letter noting that the change has been made.

Thank you,

Ashley Newbry, EiT
