RE: Application for Permit 69-11539

Dear Mr. McKee:

We are in the process of reviewing the above referenced application for permit and find we need additional information. In order to proceed with your application we need to know where you intend to divert the water. We need that information inserted under item 3 on the application form describing the location to a 40-acre tract. The application form is not considered complete without a point of diversion description. I have included a copy of your application form that you can insert the information and return to this office for processing. Please insert the information on the "amended" application form, **date and initial all changes**.

It appears to me that you intend to divert the water at your property (pursuant to the answers to item 10 on the application form). However, if you plan to ditch the water from your neighbor's pond to your pond, the point of diversion would be at the outlet of the existing pond and you will need to have permission from that property owner to develop your ditch. If this is the case, please change your response on item 10 of the application form. Please mark your proposed point of diversion and pond on the enclosed map. The maps you submitted work fine but since they did not delineate the location of the 40 acre tracts I request you use the enclosed map to depict your proposal. This will also assist you in completing item 3 on the form.

Please make the changes &/or clarifications on the enclosed copy of your application form and return it to this office within the next 30 days so we can continue with our review. You may seek additional time to provide the information by making a written request. The application may be voided without a timely written reply within the next 30 days. Refunds are not issued for voided applications.

If you have any questions concerning this matter, please do not hesitate to contact this office.

Sincerely,

KAY WALKER
Sr. Water Resource Agent
