Re: Water Right Application 65-23594 and Well Drilling Fee Upgrade Request

Dear Applicant:

Your recent water right application proposes ground water use from a well. All wells drilled in Idaho after June 30, 1987, require well drilling permits. A well might need a water right along with the drilling permit, depending on the intended use of the well.

According to the records of Idaho Department of Water Resources (IDWR), your well was drilled in 2007 under a \$75 domestic well drilling permit. A \$75 drilling permit covers a well that does not require water right approval from IDWR. This is typically a single-family domestic well.

Proposed use from your well does require water right approval, and your water right application seeks that approval. The well drilling fee for a well requiring a water right is \$200 instead of \$75. IDWR must collect the unpaid balance of \$125 for a well drilled under those circumstances.

Additionally, there were a few incomplete items on your water right application. Enclosed is an amended application drafted to address those incomplete items (item no. 2 & 3 source, item no. 6 diverting works, item no. 8 place of use domestic and stockwater uses, item no. 9) based upon your original application information. Please review this amended application, make any necessary corrections (initial and date next to corrections), sign and return with the well drilling upgrade fee.

Please submit the amended application and remit \$125 to upgrade your well drilling permit within the next thirty days to facilitate processing of your water right application.

IDWR forms and other information are available on the Internet at www.idwr.idaho.gov. Please contact me at 208-334-2190 if you have any questions. Thank you for your attention to this matter.

Sincerely,

Angela M. Grimm, P.G.
Water Resource Agent, Sr.
