Subject: Water Permit 23-7180

This is to confirm our telephone discussion on 11-14-2011 regarding the stated permit and the issues #6 and #10 from you to me on November 3, 2011.

#6 Regarding a lockable head gate: I obtain my water from a private ditch and the water to that ditch is controlled by the ditch rider of Palisades Irrigation Company.

#10 Regarding rental and assigned water: I don believe I have used any of this water up to date. I bought shares in the Palisades Irrigation Company to use water from the water they have. Also, I have bought storage water from Palisades Reservoir. These purchases was bought because I was told in 1999 that all 1900 [high water] would be owned by the canal company. However, I would like to maintain this permitted water right.

If further clarification is needed please contact me.

Thanks, Ronald J. Peterson

On 11/14/11 I had a conversation with Ron Peterson, 23-7180 right holder. He told me that his water is delivered through Baker Ditch and the water is controlled by a ditch ~~trg~~ rider. Ron also told me that he owns 10 shares in Palisades Creek Canal Co. and rents water from Palisades Users storage every year. He was not aware that he ever used this right and believes it is considered high water.
