

MEMORANDUM

TO: File 95-11063

FROM: Daniel Nelson – Staff Hydrologist

DATE: January 6, 2015

SUBJECT: Telephone Conversation with Thomas Cunningham

I called Thomas Cunningham today, and he confirmed that he has a ½ Hp power pump and a 5 millimeter or 2/10ths of an inch screen on his intake. Ms. Cunningham also confirmed in a later telephone call that there is only one pump in the lake and one home on this property. Therefore, water right 95-624 is a direct overlap.

These are questions that I asked him in an email dated December 9, 2014. Mr. Cunningham did not return my correspondence, but tried to work through the northern region manager instead. Some confusion occurred, so I called him to help prevent any confusion he may have had.
