Re: Idaho Water Company and Huettig Water Right 36-16390

Dear Mr. Merritt:

Idaho Water Company is submitting two water right transfers. One transfer is to Moss Greenhouses and the second is to Ardel Wickel. Through the analysis of the transfers, IDWR identified some concerns regarding the place of use location for water right permit 36-16390.

Water right Permit 36-16390 is a waste water irrigation right. It is proposed to reduce the current place of use of 36-16390 to 781.0 acres by relinquishing a 40.0 acres in the T 10S R 20E Sec. 28 NWSW.

Due to the 3.0 cfs diversion rate of 36-16390, it is not possible to irrigate the entire place of use of 36-16390 with waste water. The topographical layout of the farm also makes it in-efficient to pump the waste water to this particular 40.0 acres of farm ground.

At this time, the Huettig's are submitting a relinquishment form and two affidavits identifying where the waste water has been utilized.

Sincerely,

Greg Sullivan, M.S., Engineer
