

MEMORANDUM

Date: December 26, 2014
To: Water Right File 37-7891/1-7086
From: medl
Re: phone call about additional permit

I received a phone call from Mr. Faulkner shortly after sending the attached email.

He has not yet received the recently issued license 37-7891/1-7086. He phoned because he did not agree that Faulkner Brothers Hydro was using any more water than it ever has. I explained that based on the information I had collected, the rate of water used by the plant exceeded the rates authorized by the permit. I also explained that we had a window of opportunity within which we could address any changes that needed to be made in the license.

I recommended that when he receives his license, that he will review it carefully and contact IDWR with his concerns.

This memo documents the files with a record of the phone call.
