KENNETH FRANKLIN

Hello Kenneth:

I have just got back from checking water on Cottonwood Butte property. The water now diverted down creek to Forsmann property from my Spring. The water has only made it three quarters of the way. I hope this gives Forsmann the message, they need to build a pond, to catch the Spring runoff, for storage.

The SPRING I cleaned out and got running, is ample water for his 8 head livestock.

I have received no Protests as of yet on the Water Permit, so hope all goes well.

I started the summer with 20 hd on my property. Now there is 60 hd. My renter ran out of water, on other land so he has them on mine.

This has been the hottest, and driest summer ever recorded, and is really hurting.

Sincerely

Wilfred Wemhoff
