MEMORANDUM

Date: December 12, 2014
To: Application for Permit 36-17042, Star Falls Farms, LLC, File
From: Jim Bitzenburg
Re: Evaluation of Sufficiency of Information Submitted

Application for permit for stock water proposes to divert 0.06 cfs (ground water) from an existing well located approximately 2.0 miles north and 1.8 miles east of Murtaugh. Water will be piped to a trough located approximately 0.6 miles northwest of the well.

- **Effect on Other Water Rights:**
No other water rights are diverted at this point. Applicant has a nearby irrigation well and a nearby domestic well. The small diversion rate and volume with this permit should have a negligible impact. No other stock water rights are overlapping the POU.
- **Sufficiency of Water Supply:**
Well was drilled as an irrigation well, but flow was insufficient. The 18" hole will likely provide ample flow for this permit.
- **Application Made in Good Faith:**
Application fee has been paid, well is already drilled, and the rest of the system should easily be completed.
- **Financial Resources:**
The applicants own (or lease) the property at the place of use and the point of diversion. Costs for the project appear to be minimal.
- **Local Public Interest:**
The application will be advertised.
- **Beneficial Use/Conservation of Water Resources:**
Proposed use is a beneficial use of water.

Review of the application finds there is no clear inconsistency with criteria set forth in Section 42-203A Idaho Code or the Water Appropriation Rules (IDAPA 37.03.08) preventing processing of this application.
