Re: Water Right 75-14277 information request

Dear Mr. Jones,

The Department of Water Resources is reviewing the permit referenced above prior to issuing a water right license. By issuing license, the Department confirms that water rights have been established in compliance with the terms of the permits. Information on the included map suggests that the point of diversion and place of use developed are in locations other than what was described on your permit. Therefore, before a license can be issued, your permit must be amended to depict your water rights as they were actually developed.

Please mark the point of diversion where the pump and pipeline are located. Then outline the place of use where the appropriated water is irrigating the ground. Once this is completed, please return the map to my office. This information will assist in the licensing process.

If you have any questions, please contact me immediately.

Sincerely,

Patrick Kelly

Water Resource Agent
