Hello Ms Edl,
I have kept your email purposely so that when our license did arrive I could then delete your note. However, it has been close to two weeks since you sent the email and we have yet to receive the license. If you mailed it to our Idaho address it would have been forwarded to our CA address. (We are currently in CA until May)
We would appreciate you checking into this matter and look forward to your response.

Just in case I am giving you our two addresses, either one will get mail to us:

CA: 14581 Sunnycrest Lane
Huntington Beach, CA 92647
ID: 11469 Gull Harbor Ct.
Post Falls, ID 83854

Thank you for your assistance,
Tom & Marie Flanagan

Mr. and Mrs. Flanagan,
Thank you for responding to my email. I believe that the license for your water right 95-16809, which was recently sent to you, may have crossed your letter in the mail.

The location of your domestic well was entered into our database this morning.

Thank you especially for confirming the location of the river pump.
I had located that pump within government lot 2, or the NE quarter of the NE quarter, and inside the stream channel boundary line. Your boat dock is a little outside of government lot 2 and outside the line.
I chose a point of diversion location for your river pump close enough to the true location so that its Public Land Survey address, L2(NE1/4NE1/4) Sec. 10, Twp 50N, Rge 05W, B.M., on the license will not need to be changed. If I had guessed too far wrong we could have made a change to the license within 14 days of its issuance. We won't need to do that.

Sincerely,
Michele Edl
