Subject: Water Right Permit 95-16805

Dear Mr. Servine,

We recently received your proof of completion form for permit 95-16805 for your property on Coeur D Alene Lake. Typically we set up an appointment with a water user to go out and verify the water use for a water right so we can license the water right. However, I can clearly define your property and home through aerial photos, so there is no real need to actually visit your property to license your water right.

I do need to verify that you have installed a $\frac{1}{4}$ (0.25) inch screen on your pump intake, and I need you to confirm that you still have a $\frac{1}{2}$ (0.5) Hp pump that you use for this property. In order to verify the fish screen requirement, all I will need is a photo of the screen, or a bill or invoice showing the screen was installed on the pump. All I really need on the pump, is for you to verbally confirm the pump is a $\frac{1}{2}$ Hp pump. If you like, you could send a bill, invoice, or pump curve to verify the size of the pump also if you like. You should be able to attain this information from the company that installed your pump, or if you have the pump out of the lake for the season, pictures will be suitable.

Once I receive the above information, I will work to get your permit licensed as quickly as possible.

Thank you so much for your time and patience.
