Re: Entry on Wild and Scenic spreadsheet

On this day in a phone call with Shelley Keene, Nick Miller and Morgan Case it was discussed how to characterized the use of this water as it relates to entry on the Wild and Scenic spreadsheet. Arguably the acres under the permit are currently irrigated by existing rights on Pole Creek and could be considered replacement water but potentially this right may be supplemental or stand as the sole source when the water from Pole Creek is diminished for these same acres. It was decided not to debit the entire 968.2 acres but debit only 390 acres based on the rate of 1"/acre for the 7.8 cfs.
