Suzanne,

I spoke with my supervisor this afternoon, and just as long as IDWR knows that there is a PWS # in place is enough to show that the public water supply system will be regulated by IDEQ. Bob Chandler did inform me of the PWS number, however it is IDEQ that I need that reference from. So, if you want to go ahead and give me that number now in reply to this email, I will print this email out and attach it to the Statement of Completion form filed by Northern Water LLC for their water right permit no. 95-9385.

Sure, I am glad to. Darla would you please let me know how I can help? The water system has been approved by DEQ Engineering. We are waiting for the water system to serve 15 or more connections and/or 25 or more people to be considered as a regulated PWS. Thanks, Suzanne (666-4624)

Suzanne:

Could you please contact Darla Block at IDWR and try and help resolve the PWS # for Lost Creek Estates. You have already established that the PWS# is 1280331. Darla is looking for a form that she says indicates that IDEQ is regulating the system, but since you don't quite regulate it yet.....?

Thanks and please keep me in the loop of emails if possible?

B.
