**Subject:** RE: Hatchery water rights

Dan,

We do not have a section at BPA that is called the "Land Management Section MMLC" so your mail sent to that address would not be as likely to reach its intended recipients, or at least not very quickly. For a more generic address, you can use-

Bonneville Power Administration  
Manager, Real Property Field Services  
P.O. Box 3621  
Portland, OR  
97208-3621

You can also have Heidi Haserot and our contacts in your file in case you send something on this by regular mail and do not receive a response when expected, or need to follow up on something in the future. We also use e-mail communications increasingly, so it can also be an effective and faster way to also send water right correspondence if you are also currently mandated to send paper versions of correspondence for water rights.

For the Newsome Fish Hatchery, I spoke with Heidi, and we expect to have the response and signed documents to you before November 28<sup>th</sup>.

Thanks,  
Chris

**Subject:** RE: Hatchery water rights

Chris,

I just spoke with our data entry folks about the address, and they want me to ask you a couple of questions. First of all, I want you to know that I am going to mail everything that I am working on for the hatcheries for the Nez Perce Tribes to Heidi, so none of that will change.

However, we try to put a good generic address for all agencies and large corporations on the water rights. Typically, we prefer not to include names in addresses on water rights, because people tend to retire or change jobs and it confuses everyone.

Do you have a standard address that you would like us to send all water right correspondence to your agency for all of your water rights? This address would need to be able to get the information we send out to right group or person within a timely manner. I am planning on leaving the address that is currently on the water right, which is the one for the Land Management Section MMLC, unless you have something that would be better. All I need is an email to make the change. I do want to warn you, that if we change the address, it will probably change all of your water rights to the updated contact information.

Let me know if you have a new standard address, or want to leave your standard mailing address as the MMLC location. There is no hurry for this information, and there is no cost to change the address. An email is suitable verification to make the change of address..

Thank you.

**Subject:** RE: Hatchery water rights

Dan,

Thank you for emailing the information to us. We will be in coordination to respond to you by November 28, 2014 for the Newsome Fish Hatchery water right.

You mentioned you had Marian Wolcotte as a contact in your file for the water rights. Now that she has retired, Heidi Haserot is a good BPA Realty contact for your file. For the hard copy documents involving the water rights held in BPA's name, you can send them to Heidi Haserot at the following BPA address:

Bonneville Power Administration  
Attention/Heidi Haserot TERR-3  
P.O. Box 3621  
Portland, OR 97232

You can also email us if you have additional amendments.

Thank you,  
Chris

**Subject:** RE: Hatchery water rights

Chris,

Thank you so much for sending me this email. I have attached a scanned copy of the amendment needed to license the Newsome Fish Hatchery. The reason for the amendment is that the point of diversion for this hatchery was supposed to be located in the SWNE quarter of Section 31, Township 30 North, Range 7 East, however, the point of diversion was actually developed in the NWNE quarter of Section 31, Township 30 North, Range 7 East. This needs to be corrected before we can move forward with licensing of this water right.

Please note that this amendment was supposed to have been returned with 14 days of the date the letter was sent or by October 24. I have been given permission to allow you until November 28, 2014 to return this amendment and the \$100 amendment fee. At this time, I can't promise that any more additional time can be granted, but you can make a request for more time, and I will see what I can do.

I also wanted to let you know that I am also working on the Yoosa Creek Hatchery. This hatchery has two water right permits, one permit is from Yoosa Creek and the other permit is from Camp Creek. It does appear as though there could be one or two amendments on these two water right permits also, but I can't tell you that until I finish my review of the field work. I am hoping to complete that work by the end of next week. If there is another amendment, I will send a copy by regular mail as required by law, and a copy to these email addresses.

If any of you have any questions, please don't hesitate to contact me.

Thank you.

**Subject:** Hatchery water rights

Hello Dan,

In follow-up to our phone call today, you can email the water right amendment documents you mentioned (e.g. for Newsome Creek and Yoosa Creek) to me and those in the cc line who are involved with the hatchery water rights for BPA.

Once we receive the documents, we will coordinate on the response for you.

Thanks,  
Chris
