

MEMORANDUM

TO: Water Right File 96-9521

FROM: Patrick Kelly – Water Resource Agent

DATE: October 28, 2014

SUBJECT: Review of Water Right File for Licensing

I was assigned to do the in-office field exam for water right 96-9521. Upon review of the property using aerial photography, I was unable to distinguish any significant appropriation for irrigation purposes on Mr. Smith's land. He confirmed that there is a pump in place and that he has planted some trees and shrub near the banks of the lake. However development of the property is not yet completed. Because his proof due date (Nov 1 2014) has not yet passed, Mr. Smith is going to request an extension of time to complete his development of the land, and is going to rescind his statement of completion form.
