Mat,

We intend to do the field exam this spring. I'll coordinate with you to make sure we address any issues that come up.

Subject: City of Nampa WR Permit No. 63-10211

Roxanne,

As you are no doubt aware from my previous emails, I am working my way to the bottom of a stack of six outstanding City of Nampa municipal water right permits. After a quick review of the file for 63-10211 it appears that a beneficial use field exam has not been conducted for this permit. I am available to conduct the field exam for this permit in early 2012, but I suspect that you may have already conducted a field exam for this permit, or the City of Nampa may desire for you to conduct the field exam for consistency. I was hoping you could check on this permit and let me know the field exam status.

A letter from Gary Spackman to Givens Pursley dated December 13, 2004 (see attached) indicates that diversion capacity should be established as it existed in 1989 (year proof was filed) and should be considered in the context of the entire system capacity.

I look forward to your reply.

Cheers,
