Subject: RE: WR Permit 63-10211 for City of Nampa

Ashley,

Scott is in the field this week, so I am following up on his behalf. We had not previously seen the 2004 letter from John Marshall to Gary Spackman; thank you for providing a copy online. Although the information attached to the letter obviously originates with the City, they were unable to provide the information to us directly (I suspect the letter and table were archived and could not be retrieved).

I'll compare the 1989 capacities and well sites to the field exam. My first thought is we may have to amend the exam based on this information that dates back to the time of proof. We'll try and turn this around as soon as possible!

Subject: WR Permit 63-10211 for City of Nampa

Hello Scott,

I am working on licensing WR Permit 63-10211 for the City of Nampa. SPF conducted the beneficial use field examination on June 9, 2014 and submitted it to IDWR on August 19, 2014.

The last page of the report shows a summary table which includes the capacity of each well. This table notes that the source of the capacity data for 7 out of 8 wells is in a report called "Pressure Irrigation System Master Plan Update", J-U-B Engineers, October 2008. I will need a copy of this report, or SPF/City could provide calculations/City records/other basis for arriving at the reported values.

In addition, I am a bit puzzled by the discrepancy between the wells selected in your field exam report and the City records enclosed in a 2004 letter to IDWR, from attorney John Marshall, representing the City of Nampa.

Found here: \\a012\DocsData\$\wATERRIGHTS\63\DBLOCK\4s1z01 .PDF

This letter includes all of the same wells mentioned in your report, with the exception of Westpark Pump (highlighted on IDWR copy). Your report notes that the Meadowbrook II well is a new POD. Are you able to provide some additional information to explain the difference in POD's?

With the exception of your BU Field Exam, here are all of the documents that IDWR has on file for this WR permit: <http://wenet/apps/appsMisc/docSelection.asp?Basin=63&Sequence=10211&SplitSuffix=>

Thank you in advance,

Ashley Newbry, EIT
