DEPARTMENT OF WATER RESOURCES

APPLICATION FOR PERMIT

To appropriate the public water of the State of Idaho

RECEIVED

SEP 17 2014

DEPARTMENT OF
WATER RESOURCES

1. Name: DAVID DICKINSON
AND
LINDA L DICKINSON
2999 HWY 93 S
SALMON ID 83467
(208) 894-4598

2. Source: GROUND WATER

3. Location of Point of Diversion:

#1 GROUND WATER L5 (NW1/4SE1/4) Sec. 20, Twp 17N, Rge 21E, B.M.
LEMHI County

4. Water will be used for the following purposes:

<u>Purpose</u>	<u>From</u>	<u>To</u>	<u>RATE OF DIVERSION</u>
IRRIGATION	04/01	to 10/31	0.02 CFS

5. Total quantity to be appropriated is: ✱ 0.02 CFS

6. Proposed diverting works:

POINT OF DIVERSION #1

- a. Type and size of devices used to divert water from the source:
- b. Height of storage dam _____ feet;
Active reservoir capacity _____ acre-feet;
Total reservoir capacity _____ acre-feet;.
- c. Proposed well diameter is _____ inches;
Proposed depth of well is 10 feet.
- d. Is ground water with a temperature of greater than 85F being sought? NO
- e. If well is already drilled, when? _____;
Drilling Firm _____;
Drilling Permit No. _____.

7. Time required for the completion of the works and application of the water to the proposed beneficial use is 5 year(s).

- 8.

- a. Describe type and size of devices used to divert water from the source. 2 HP WATER PUMP TO 2" PIPE 10' DEEP WELL
- b. Height of storage dam _____ feet; active reservoir capacity _____ acre-feet; total reservoir capacity _____ acre-feet. If the reservoir will be filled more than once each year, describe the refill plan in item 11. For dams 10 feet or more in height OR reservoirs with a total storage capacity of 50 acre-feet or more, submit a separate Application for Construction or Enlargement of a New or Existing Dam. Application required? ☐ Yes ☐ No
- c. Proposed well diameter is 16" DIAMETER TANK inches; proposed depth of well is 10 feet.
- d. Is ground water with a temperature of greater than 85°F being sought? ☐ Yes ☒ No
- e. If well is already BACKHOE drilled, when? 3/22/11; drilling firm UNKNOWN; well was drilled for (well owner) FORMER OWNER MICHAEL REGLI; Drilling Permit No. UNKNOWN
7. Description of proposed uses (if irrigation only, go to item 8):
- a. Hydropower; show total feet of head and proposed capacity in kW. _____
- b. Stockwatering; list number and kind of livestock. _____
- c. Municipal; complete and attach the [Municipal Water Right Application Checklist](#).
- d. Domestic; show number of households _____
- e. Other; describe fully. _____

8. Description of place of use:

- If water is for irrigation, indicate acreage in each subdivision in the tabulation below.
- If water is used for other purposes, place a symbol of the use (example: D for Domestic) in the corresponding place of use below. See instructions for standard symbols.

TWP	RGE	SEC	NE				NW				SW				SE				TOTALS
			NE	NW	SW	SE	NE	NW	SW	SE	NE	NW	SW	SE	NE	NW	SW	SE	
17N	21E	20																	1 ACRE

Total number of acres to be irrigated: 1.00

9. Describe any other water rights used for the same purposes as described above. Include water delivered by a municipality, canal company, or irrigation district. If this application is for domestic purposes, do you intend to use this water, water from another source, or both, to irrigate your lawn, garden, and/or landscaping? We have two sources of water. See Plat A domestic well we use in the home, lawn + garden. The irrigation well we use for haying.
10. a. Who owns the property at the point of ^{well} diversion? DAVID + LINDA DICKINSON
- b. Who owns the land to be irrigated or place of use? DAVID + LINDA DICKINSON
- c. If the property is owned by a person other than the applicant, describe the arrangement enabling the applicant to make this filing:

11. Describe your proposal in narrative form, and provide additional explanation for any of the items above. Attach additional pages if necessary.

Please see Request for Extension of time, etc. + attached information

The water project is complete.

12. Time required for completion of works and application of water to proposed beneficial use is _____ years (minimum 1 year).
13. **MAP OF PROPOSED PROJECT REQUIRED** - Attach an 8½" x 11" map clearly identifying the proposed point of diversion, place of use, section #, township & range. A photocopy of a USGS 7.5 minute topographic quadrangle map is preferred.

The information contained in this application is true to the best of my knowledge. I understand that any willful misrepresentations made in this application may result in rejection of the application or cancellation of an approval.

The following application(s) have been filed to appropriate the public waters of the State of Idaho:

74-16027
MC FARLAND LIVESTOCK CO INC
C/O TEX J KAUER
PO BOX 50
LEMHI ID 83465
Point of Diversion SENENW S11 T15N R27E LEMHI County
Source UNNAMED SPRING Tributary SINKS
Use: STOCKWATER
01/01 to 12/31
0.2 CFS
Total Diversion:
0.2 CFS
Date Filed: 10/15/2014
Place Of Use: STOCKWATER
T15N R27E S11 NENW

This application proposes the diversion and use of water tributary to a federally designated Wild & Scenic River. The decreed minimum stream flow rights for the federal Wild & Scenic Rivers are subordinate to certain categories of water use and to specific amounts of water use established after the minimum stream flow. The water use proposed in this application will benefit from the subordination provision because it is for stockwater purposes. The diversion rate will be applied to the subordination amounts specified in the decree for the applicable Wild & Scenic River.

Application For Permit No. 75-14785

Dear Applicant(s):

The Department of Water Resources has received your water right application. Please refer to the number referenced above in all future correspondence regarding this application.

A legal notice of the application has been prepared and is scheduled for publication in the RECORDER HERALD on 11/13/2014 and 11/20/2014. Protests to this application may be submitted for a period ending ten (10) days after the second publication.

If the application is protested, you will be sent a copy of each protest. All protests must be resolved before the application can be considered for approval. If the protest(s) cannot be resolved voluntarily, the Department will conduct a conference and/or hearing on the matter.

If the application is not protested, the Department will process your application and notify you of any action taken on the application. If your application is approved, the Department will send you a copy of the permit.

Please contact this office if you have any questions regarding the application.

Sincerely,

Jean Hersley
Technical Records Specialist

MEMORANDUM

TO: Water Right File 75-14785

FROM: Patrick Kelly – Water Resource Agent

DATE: 10/21/2014

SUBJECT: Application review memo

Application for permit 75-14785 was submitted by David and Linda L Dickinson (applicant) in an effort to license a water system built by the previous land owner. Taxlot data shows the property is owned by David G Dickinson.

Water permit 75-14519 was a surface water irrigation permit that never submitted a statement of completion. Status of this permit has lapsed. Also, the system that was built by the previous owner diverts ground water from a shallow well on the property instead of what was actually permitted - the Salmon River. Mr. Dickinson has provided a detailed description of the POD including photos. He also responded to the LPI letter which was received on 10/10/2014. Photos of the well/pump and irrigated land were included. The POD is located on the Dickinson property. Applicant states that a 2 hp pump is used to divert water from a 10' deep well 105' from the Salmon River. Legal descriptions for POU & POD were verified and found accurate.

The application for permit is an irrigation use for 1 acre of land used for "haying". The property measures a total of 2.5 acres. Because this is an existing use, preliminary area measurements using aerial photography show 1.0 acres of land being irrigated for hay. A hand drawn diagram submitted with the application shows sprinkler lines that may irrigate other areas of the property. Contact was made with the Dickinson's and a recommendation was made to amend the application for permit. The applicants requested to amend the application to 2.0 acres at a diversion rate of 0.06 cfs via e-mail on October 21, 2014.

There are 2 wells on the property. The applicant has stated that the irrigation well is used for haying and a domestic well is used in the home and for the garden/lawn in the back. No other water rights are associated with this property. Overlap review does show another water right 75-10843. However, this is a domestic water in the name of Donald Lamping who owns a separate property south in the same QQ.

With the detailed information and photos provided by Mr. Dickinson, I recommend permitting application 75-14785 for 2.0 acre at 0.06 cfs.

Kelly, Patrick

To: Kelly, Patrick
Subject: Re: Application for permit 75-14785

Hello Patrick Kelly,

I do use the irrigation system in the center round yard. We do need to increase to 2.0 acres at 0.06 cfs. Thanks for seeing this !

Sincerely, David Dickinson permit # 75-14785

On Monday, October 20, 2014 1:37 PM, "Kelly, Patrick" <Patrick.Kelly@idwr.idaho.gov> wrote:

Mr. & Mrs. Dickinson,

My name is Patrick Kelly and I have been assigned to review your application for permit 75-14785. In measuring the property for the permit's Place of Use, I measured the hay field between the driveway and Hwy 93 to be 1.0 acres. This is the limit of what you applied for. If you are using the irrigation well water for any other purposes such as inside the round-a-bout yard, I suggest you apply for 2.0 acres at a rate of 0.06 cfs. When it comes time to do the field exam later in the licensing process, a field agent can always recommend less than what is on your permit to license. But the agent can never grant more than what the permit allows. The fee for what you applied for and what I suggest are the same, so this will not incur an additional cost. This will advance your priority date from August to October, but it may be something you want to pursue.

Please respond by email your decision and state the area and diversion rate that you would like to move forward with. We will proceed with the public announcement once I receive your response. If you have any questions, please contact me at 208-287-4933.

Sincerely,

Patrick Kelly

RECEIVED
OCT 10 2014
DEPARTMENT OF
WATER RESOURCES

OCT. 8, 2014

Regarding any local public interest 75-14785

Dear Pamela Skaggs, Water Rights Supervisor

1. Our well is only 10 feet deep
2. With such a shallow water table there should be leakage on the river bank. Our river frontage is dry above the river.
3. The water table is even more shallow by Hwy 93 the furthest point from the river.
4. Because the water table is so shallow we are repumping water we use for irrigation minus evaporation.
5. The well is over 105' from the river. This application is not taking water below a surface tributary.
6. No matter how long I irrigate it has no effect on the water level in the underground tank.
7. I usually run the sprinklers for 4 hours at a time every other day July + August. Less time May, June + Sept.
8. We use Orbit lawn sprinklers on a 1 inch line so not a great deal of water is being used.
9. This is not an application for the use of Pivots or motorized wheel irrigation.
10. I believe this application will have absolutely no effect on the Salmon River flow.

Sincerely,

David Dickinson

RE: Application to Appropriate Water in the Upper Salmon River Basin 75-14785

Dear Water Right Applicant:

The Department of Water Resources' (IDWR) records show you filed an application to establish a new use of water in the upper Salmon River basin. Idaho Code § 42-203A(5) requires IDWR to determine whether each water right application satisfies all the criteria necessary for appropriating water in Idaho. One statutory criterion requires IDWR to determine the local public interest relative to the proposed water use. Idaho Code § 42-202B(3) defines the local public interest as "the interests that the people in the area directly affected by a proposed water use have in the effects of such use on the public water resource." The local public interest has many facets, including the effects of a proposed water use on aquatic habitat for fish and wildlife resources.

The upper Salmon River basin is home to stocks of chinook salmon, sockeye salmon, steelhead trout, and bull trout, all of which are listed as threatened or endangered under the Endangered Species Act (ESA). Since the early 1990s, local water users, conservation districts, and federal and state agencies have cooperated to implement conservation measures intended to protect and restore habitat for ESA-listed species in the upper Salmon River watershed. For example, at the request of local water users the Idaho Legislature directed the Idaho Water Resource Board (IWRB) to establish a minimum stream flow in the lower Lemhi River for fish passage. The minimum stream flow is maintained through a water supply bank and temporary or permanent acquisition of additional water supplies by willing buyers from willing sellers.

Pursuant to the Snake River Water Rights Agreement of 2004, Idaho has been developing a long term conservation plan for the benefit of ESA-listed species in the Lemhi River basin. Improving conditions in flow-limited river reaches and streams is a fundamental component of the Lemhi plan. In addition to IDWR, numerous state agencies, including the Office of Species Conservation, Idaho Department of Fish and Game, Idaho Department of Environmental Quality, Idaho Soil and Water Conservation Commission, and Idaho Department of Lands, have committed and continue to commit significant resources toward this objective under the following programs:

- Columbia Basin Water Transactions Program
- National Marine Fisheries Service Pacific Coastal Salmon Recovery Fund
- U. S. Fish & Wildlife Service Aquatic Species Conservation Fund

- Salmon and Clearwater River Basins Habitat Fund
- 2008 Columbia Basin Fish Accords

Letter to Upper Salmon River Basin Water Right Applicants

Page 2

A myriad of habitat restoration projects are being constructed/implemented in other parts of the upper Salmon River basin. These projects have been coordinated with the local communities and water users through the Upper Salmon River Basin Watershed Program and predecessor programs, including the model watersheds. Furthermore, the Snake River Water Rights Agreement of 2004 contemplates the development of additional conservation plans for other upper Salmon River basin watersheds. Accordingly, the draft Comprehensive State Water Plan under revision by the IWRB contains policies for the Salmon River basin that focus on the protection and restoration of instream habitat for ESA-listed species through voluntary participation in conservation programs.

Because of the ESA-listed species recovery efforts in the upper Salmon River basin, IDWR must determine on a case-by-case basis whether it is in the local public interest to authorize proposed water uses that would further deplete flow-limited stream reaches.

Pursuant to Rule 40.04.c of the Water Appropriation Rules (IDAPA 37.03.08.040.04.c), the applicant has the ultimate burden of persuasion regarding the items that must be evaluated in connection with each water right application. Before proceeding further with your application, IDWR requests you submit additional information about how your proposal invokes any local public interest concerns for ESA species recovery. Within 30 days, please submit any additional information you believe IDWR may need to evaluate and determine the local public interest in the water you propose to divert and use. If IDWR has not received a response from you within 30 days, IDWR will assume you have no comment regarding the local public interest, and processing of your application will resume with the information currently on file. Processing will include public notice and the potential for formal protests by other interested parties. Applications that are not in the local public interest will be denied. If you wish to withdraw your application before it is processed, please notify IDWR in writing.

If you have any questions, please call me at 208-287-4951, or email me at pam.skaggs@idwr.idaho.gov.

Sincerely,

Pamela Skaggs
Water Rights Supervisor

Dear Jean Hersley,

Re: Permit # 75-14519
Permit # 75-14785

RECEIVED

SEP 17 2014

DEPARTMENT OF
WATER RESOURCES

The former property owner didn't complete the water rights project as applied. I talked to Dan Nelson and he said to send in an extension of time and a new water right permit application. A check for \$50 was included. All irrigation will be from a well and not diverting any water from the Salmon River. The water project is complete and in use. It is not clear to me what is the next step and how much more time I need to receive water rights. Please note that the property lines on enclosed map are incorrect. The property lines were surveyed by a licensed surveyor TMS. LS 8348.

Thank you,

David Dickinson

RE: Application for Permit

Dear Applicant(s):

The Department of Water Resources has received your water right application. Preliminary review of the application indicates that it is incomplete and cannot be accepted for processing. We are sending you a corrected application. Please verify that the highlighted areas are correct. The required information is described below:

- The Time required for beneficial use of water was not provided in item # 7. Time required for beneficial use is from 1 to 5 years. Please correct and initial the application if you do not need 5 years.
- The Fee was not provided. Fee for 0.02 cfs is \$100.
- The Place of Use or acres irrigated was not provided and point of diversion identified is not in the same legal description as your property. I have enclosed a map with your property outlined in blue. Please mark on that map where your point of diversion is located. Also, please verify the legal description of your place of use.

If you have any questions, please contact me at (208) 287-4942. Thank you.

Sincerely,

Jean Hersley

Dear Sir,

Please include these pictures
with my application for water rights.
The application is in a separate envelope.
Water right # 75-14519.

Thankyou,
Dana Dickinson

AUG 26 2014

Department of Water Resources

Dear Sir,

I talked to Dan Nelson about this project. I believe the original application was to divert water from the Salmon River. Instead a shallow well was dug and water is taken from ground water for irrigation. The project is complete. I don't know how to contact a certified water right examiner?

Thankyou,
Dan Dickinson
