Department of Water Resources
Permit to Appropriate Water

NO. 1-10626

Priority: June 19, 2013

Maximum Diversion Rate: 585.00 CFS

This is to certify, that SNAKE RIVER VALLEY IRRIGATION DISTRICT
221 S EMERSON
SHELLEY ID 83274

has applied for a permit to appropriate water from:

Source: SNAKE RIVER

Tributary: COLUMBIA RIVER

and a permit is APPROVED for development of water as follows:

BENEFICIAL USE

GROUND WATER
RECHARGE

PERIOD OF USE

01/01 to 12/31

RATE OF DIVERSION

585.00 CFS

LOCATION OF POINT(S) OF DIVERSION:

SNAKE RIVER L2 (NE $\frac{1}{4}$ SW $\frac{1}{4}$ NW $\frac{1}{4}$) Sec. 15 Twp 01N Rge 37E, B.M. BONNEVILLE County

State of Idaho

CONDITIONS OF APPROVAL

1. Proof of application of water to beneficial use shall be submitted on or before **November 01, 2019**.
2. Subject to all prior water rights.
3. Use of water under this right will be regulated by a watermaster with responsibility for the distribution of water among appropriators within a water district. At the time of this approval, this water right is within State Water District No. 01.
4. Water may only be diverted under this right in an amount that does not reduce flows in the Snake River below 2,070 cfs measured in the Snake River at Blackfoot U.S.G.S. Gage No. 13062500.
5. Water may only be diverted for recharge under this right when 2,700 cfs or more is flowing past Minidoka Dam.
6. The diversion of water under this right shall not exceed ten thousand (10,000) acre-feet on an average annual basis.
7. Absent engineering controls to prevent fish entrainment into recharge facilities, when any amount of water is available for diversion under this right, and after consultation by the right holder with the Idaho Department of Fish and Game, the amount of water diverted under this right from the river will be adjusted up and down at a rate which minimizes the possibility of fish entrainment in the recharge facilities. Provided, however, that flows diverted into recharge facilities may be adjusted, without consultation, by Water District No. 1 personnel consistent with its statutory duties to regulate and adjust diversions when all or a portion of this right is no longer in priority.
8. Diversions off of the right holder's private canals to designated off-canal recharge sites shall be designed and constructed as necessary to minimize negative impacts to fish. The right holder shall provide information concerning the design of such diversion structures to the Idaho Department of Fish and Game for review and comment prior to construction.
9. Upon a good faith request from the Idaho Department of Fish and Game, the right holder shall meet to discuss and attempt to resolve in good faith any concerns associated with the exercise of this right and potential negative effects on fish and wildlife resources.
10. This right is subject to all applicable provisions of Section 42-234, Idaho Code.

State of Idaho
Department of Water Resources
Permit to Appropriate Water
NO. 1-10626

11. Pursuant to Section 42-234(4), Idaho Code, to ensure that other water rights are not injured by the operations of the recharge project authorized by this right, the Director has authority to approve, disapprove, or require alterations in the methods employed to achieve ground water recharge.
12. Pursuant to Section 42-234(3), Idaho Code, the Director may reduce the amount of water that may be diverted for recharge purposes under this right even though there is sufficient water to supply the entire amount authorized for appropriation under this right.
13. Approval of this permit does not constitute approval by the Idaho Water Resource Board as may be required pursuant to Section 42-1737, Idaho Code.
14. The right holder shall record the daily quantity of water diverted for ground water recharge and shall report the diversion data for the prior calendar year to the Department by February 1 each year. Reporting shall occur in the manner specified by the Department, consistent with Section 42-701, Idaho Code. To facilitate this reporting requirement, the right holder shall install and maintain a totalizing measuring device approved by the Department at each point of diversion and at each point where water is delivered from the conveyance system into a designated recharge site.
15. Consistent with Section 42-234(5), Idaho Code, seepage from canals incidental to delivery of irrigation water shall not be considered ground water recharge under this right. Canal seepage will be considered to be ground water recharge only when the canals are not conveying water for irrigation or other beneficial uses.
16. Prior to the diversion and use of water under this approval, the right holder shall comply with applicable water quality permitting requirements administered by the Department of Environmental Quality or the Department of Agriculture.
17. This right does not grant any right-of-way or easement across the land of another.
18. Project construction shall commence within one year from the date of permit issuance and shall proceed diligently to completion unless it can be shown to the satisfaction of the Director of the Department of Water Resources that delays were due to circumstances over which the permit holder had no control.

This permit is issued pursuant to the provisions of Section 42-204, Idaho Code. Witness the signature of the Director, affixed at Boise, this 6th day of October, 2014.

for GARY SPACKMAN
Director
