RE: Draft Transfer Application / Amendment of Permit

Dear Mr. Sturzen:

Thank you for meeting with me in Idaho Falls to prepare the proposed transfer. Enclosed is the draft application and map we discussed. Consistent with your instructions, this transfer will create a permissible place of use for your water rights covering most of your property. This will give you the flexibility to move irrigated acres around the farm from year to year. The permissible place of use is highlighted in purple on the enclosed map. The initial irrigated acres shape is highlighted in green.

The filing fee for the transfer application will be \$820. This is based on the number of acres changing through the transfer. If the transfer application correctly describes the changes you would like to make to your water rights, please sign the enclosed application and return the signature page and the filing fee to our office (check made out to IDWR). Feel free to keep a copy of the application for your records.

I've also included an Amendment of Permit (for licensing purposes) for Permit 33-7183. This is the ground water permit that still needs to be licensed. I propose amending the permit, prior to licensing to make the water right match the proposed transfer. Through the amendment process, License 33-7183 will have a permissible place of use and an initial irrigated acres shape matching the other water rights. The fee for amending Permit 33-7183 is \$100.

The transfer application fee and permit amendment fee can be paid in a single check. We will begin processing the transfer application once it is received. I estimate that the transfer approval and water right license will be completed within two weeks. Please contact me with any questions you may have.

Sincerely,

James Cefalo
