RE: Measuring Device Condition #212 for Permit 35-14139 Idaho Falls School Dist. #91

Dear Mr. Cefalo:

This is a petition to remove condition #212 on Permit 35-14139, requiring that the system have a measuring device installed before diversion of the water.

Permit 35-14139 is for non-consumptive use for a closed-loop heat pump system. The system consists of a production well with a mainline to heat pumps, to extract the heat, and then the water is injected back into the ground through an injection well.

Normally when the application is approved I review the conditions of approval and notify our client of my findings. It appears that permit 35-14139 slipped through the cracks and I did not review the conditions on the permit, otherwise I would have requested that the condition be removed at the time the permit was approved.

Please feel free to contact me if you have any questions. Your kind assistance in this matter will be greatly appreciated.

Sincerely,

A handwritten signature in black ink that reads "Keith C. Wilson". The signature is fluid and cursive, with the first name "Keith" and last name "Wilson" clearly distinguishable.
